Lab Experiment 6

Introduction to Word Processing

Image 1 - Logo of Microsoft Word

Learning Outcomes

Upon completing this class activity, students will be able to:

1. **Create and Format Documents**
    - Demonstrate the ability to create, format, and save professional documents in Microsoft Word, including adjusting font styles, sizes, and text formatting.
2. **Insert and Organize Content**
    - Insert and format text, images, and tables into Word documents, and apply appropriate formatting to bullet and numbered lists.
3. **Apply Advanced Formatting Techniques**
    - Modify document themes, adjust paragraph indentation and spacing, and create custom headers and footers to enhance the visual presentation of documents.

4. **Work with SmartArt and Shapes**

   - Insert and format SmartArt and shapes and apply design elements such as borders and shading to paragraphs and pages to improve document layout.

5. **Demonstrate Proficiency in Word Processing**

   - Apply advanced Microsoft Word functions and techniques to produce well-organized, error-free documents that meet professional standards.

Lab Exercise

Complete the following skills from the lab activity:

- **Skill 1:** Enter and format text, change fonts and styles, and save documents.
- **Skill 2:** Insert and format text, images, tables, lists, and adjust spacing; create custom headers and footers.
- **Skill 3**: Modify themes, set columns, add borders and shading, and insert SmartArt and shapes.

Deliverables

- Submit your completed lab exercise or responses as instructed by your instructor.

Introduction

Microsoft Word is a word processing application that allows users to create a variety of documents, ranging from simple memos to complex reports. With Word, you can type and format text, insert graphics and tables, and create professional documents such as letters, reports, and newsletters.

File Extensions

Files created in Microsoft Word use specific file extensions to indicate their type:

- **.docx** — for Word documents created in versions 2007 and later (including Word 2016).
- **.doc** — for documents created in Word 2003 and earlier.

Common Uses of Microsoft Word

Microsoft Word is widely used in business settings for writing letters, memos, reports, flyers, newsletters, and more. It offers tools to efficiently type, edit, and format text, insert SmartArt, tables, and images. To support professional communication, the program flags spelling and grammar errors in real time. Most businesses adhere to a standardized format for official letters.

Lab Activity: Microsoft Word Skills

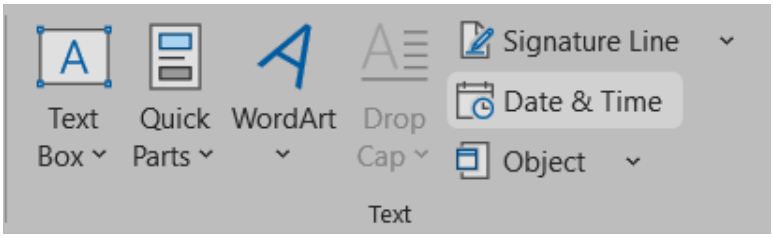

In this activity, students will complete three core skills using Microsoft Word:

- **Skill 1**: Enter and format text, change font styles, apply text styles, and save documents.
- **Skill 2**: Insert and format text, images, and tables; format bulleted and numbered lists; adjust paragraph spacing and indentation; create custom headers and footers.
- **Skill 3**: Modify themes and set up columns; add borders and shading to paragraphs and pages; insert and format SmartArt and shapes.

Skill 1: Entering and formatting text, changing font format, inserting text Styles, creating custom headers and footers, and saving Word document.

Lab procedure to complete skill 1:

1. Start **Word 2016**, and then on the start screen, click **Blank document**
2. On the **Menu** tabs, click on **File** tab, and save the document as: *activity1_lastName.docx*
3. With the point in blank paragraph, type *Queensborough Community College* and press Enter. Type *The City University of New York* and press Enter. Type *Department of Engineering Technology* and press Enter three times.
4. To insert the date in Word, click on **Insert** tab and in the Text group, click on Insert Date and Time icon .

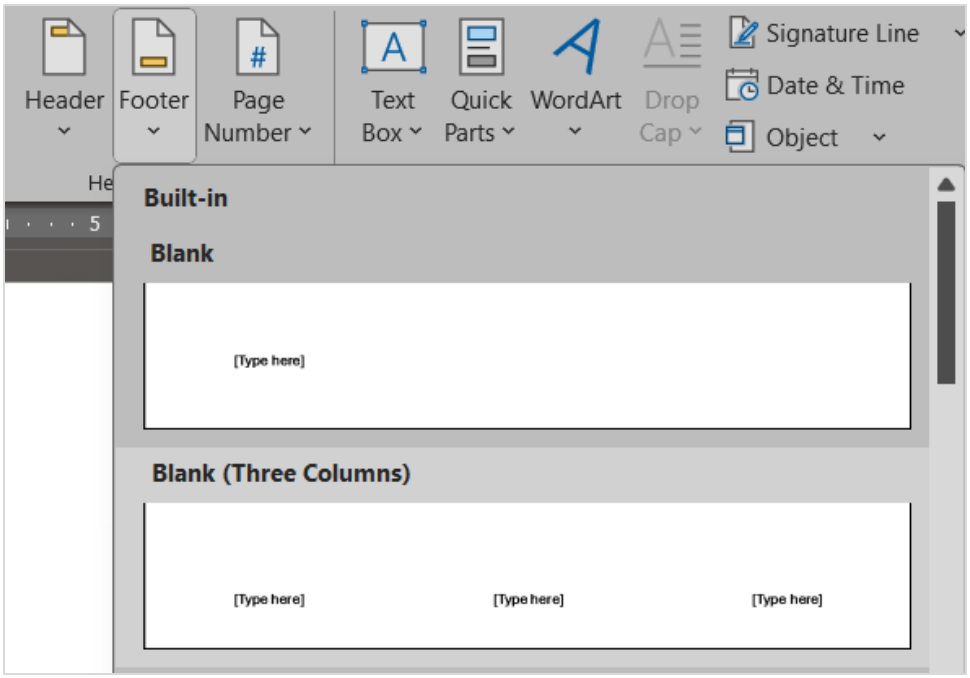

5. In the 'Date and Time' table, select the second option in the list, which displays both the day and the date.

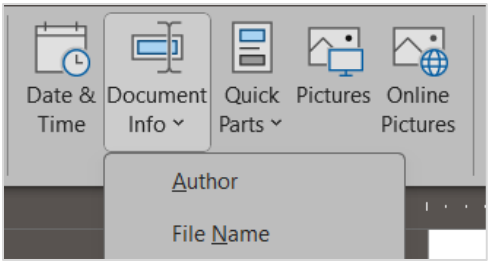

6. After inserted the date, press Enter three times, type "*TECH 100 – Introduction to Engineering and Technology"* and press Enter. After the Enter, type the following paragraph:
   An introduction to the history, philosophy and methodology of engineering and technology related professions. The disciplines of computer, electrical and mechanical engineering and technology are introduced. Basic mathematical, graphical and analytic skills are developed as well as experimentation and data analysis techniques. The analysis and presentation of engineering data and designs, as well as ethical and professional considerations, are considered.

   After the paragraph, press Enter.

7. To insert a Footer, click on **Insert** tab and in **Header & Footer** group, click on the **Footer**. From the Built-in list, select **Blank (Three Columns)**

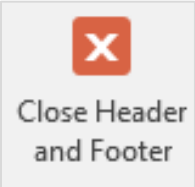

8. In the Footer, click on the left side of the footer and type *By: Student's full name*; click on the middle of the footer and type *Activity 1 – Microsoft Word;* click in the right side of the footer and insert the document title. To insert the document title, once the **Header & Footer Tools** is active, click on **Document Info** and select **File Name** from the list.

The Footer should look like the following:

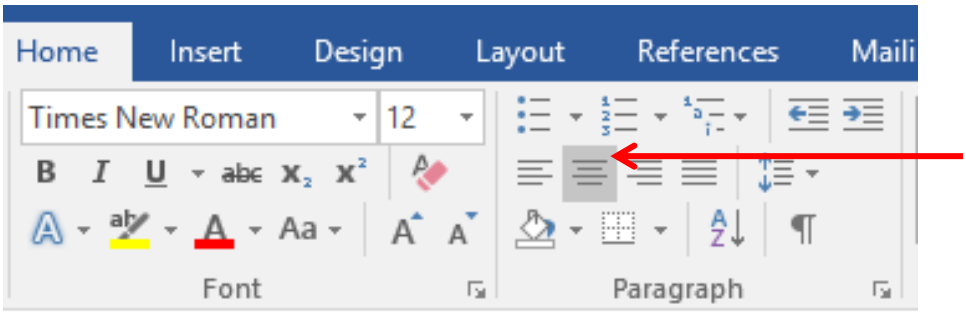

9. Once the footer in done, click on the **Close Header and Footer** icon:

10. To style the college and department names, select the first three lines using the click-and-drag technique.

11. With the three lines selected, in the **Paragraph** group, select the center paragraph icon

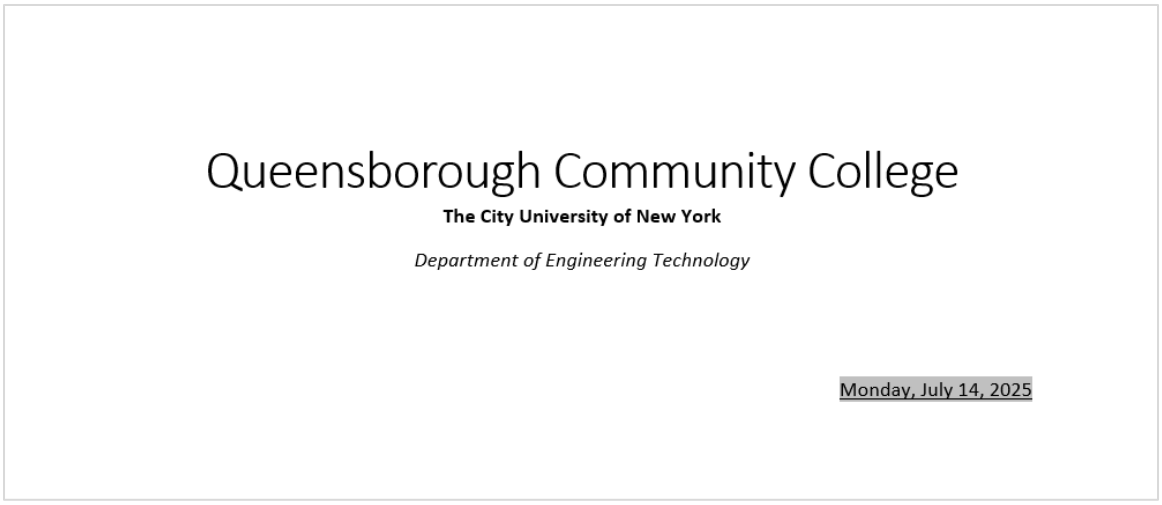

12. To style the college's name, we are going to select the first line and from the **Styles** group, select **Title.**
13. Select the second line and apply the **Strong** style
14. Select the third line and apply the **Emphasis** style.

Queensborough Community College

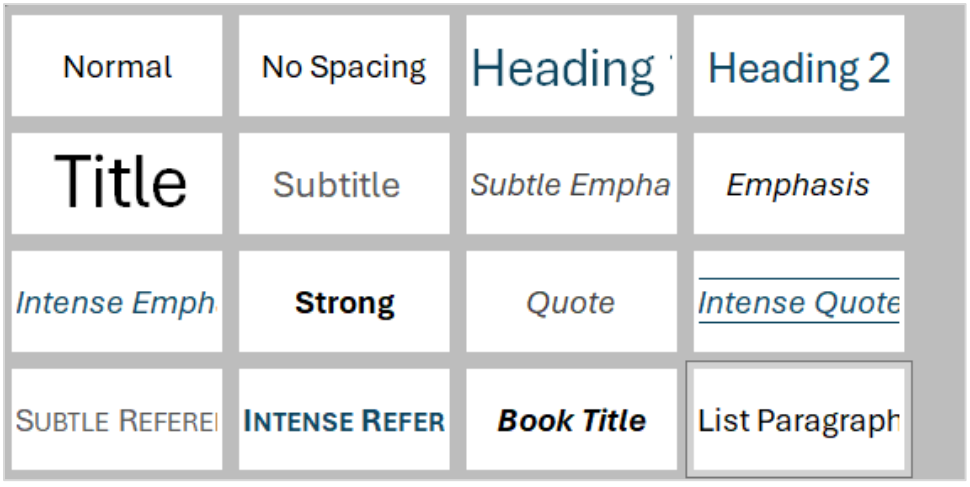

The City University of New York

Department of Engineering Technology

15. Select the date and underline and align the date to the right:

16. Select the course's name line and apply the **Intense Quote** style. If the Intense Quote style is not shown in the main list, click on the Down Arrow to see all the font Styles.

17. Select the whole course description using the left click-hold-drag technique, and make the paragraph **Justify.**
18. Save the Word document.

The complete Word document should look like the following image:

Queensborough Community College

The City University of New York

Monday, July 14, 2025

TECH 100 – Introduction to Engineering and Technology

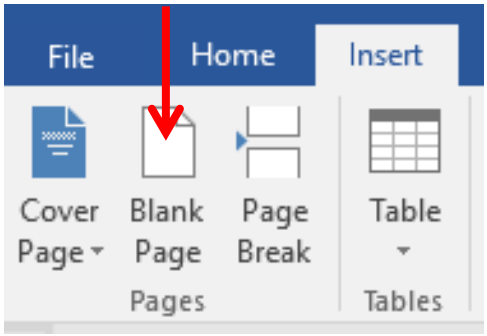

An introduction to the history, philosophy and methodology of engineering and technology related professions. The disciplines of computer, electrical and mechanical engineering and technology are introduced. Basic mathematical, graphical and analytic skills are developed as well as experimentation and data analysis techniques. The analysis and presentation of engineering data and designs, as well as ethical and professional considerations, are considered.

By: Huixin Wu Activity 1 – Microsoft Word activity1_HuixinWu.docx

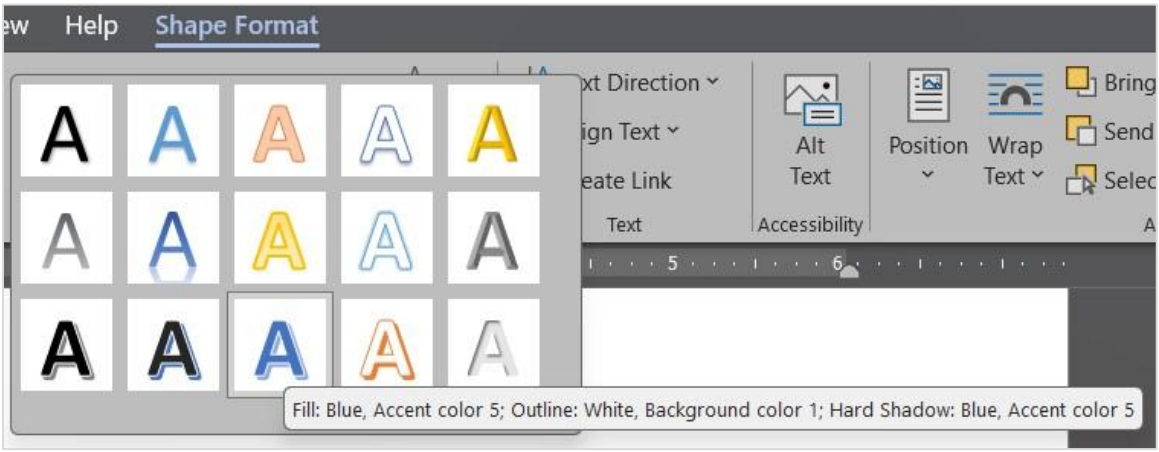

Skill 2: Inserting and formatting text, pictures, and tables, formatting bulleted and numbered lists, adjusting paragraph indentation and spacing

You can insert and modify text, pictures, tables, lists, and shapes in Microsoft Word.

19. Insert a blank page using the combination key **Ctrl + Enter**. The other way to insert a new blank page is to go **Insert** tab and click on **Blank Page** icon

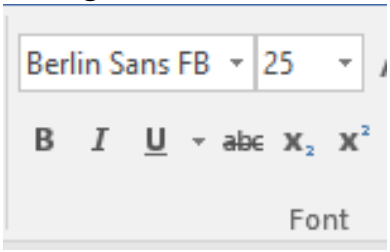

20. In this second page, we are create a title using WordArt. Go to **Insert** tab and click on **WordArt** icon from the Text group.
21. From the **WordArt** list, select the **Fill: Blue, Accent color 5; Outline: white, Background color 1; Hard Shadow: Blue Accent color 5**

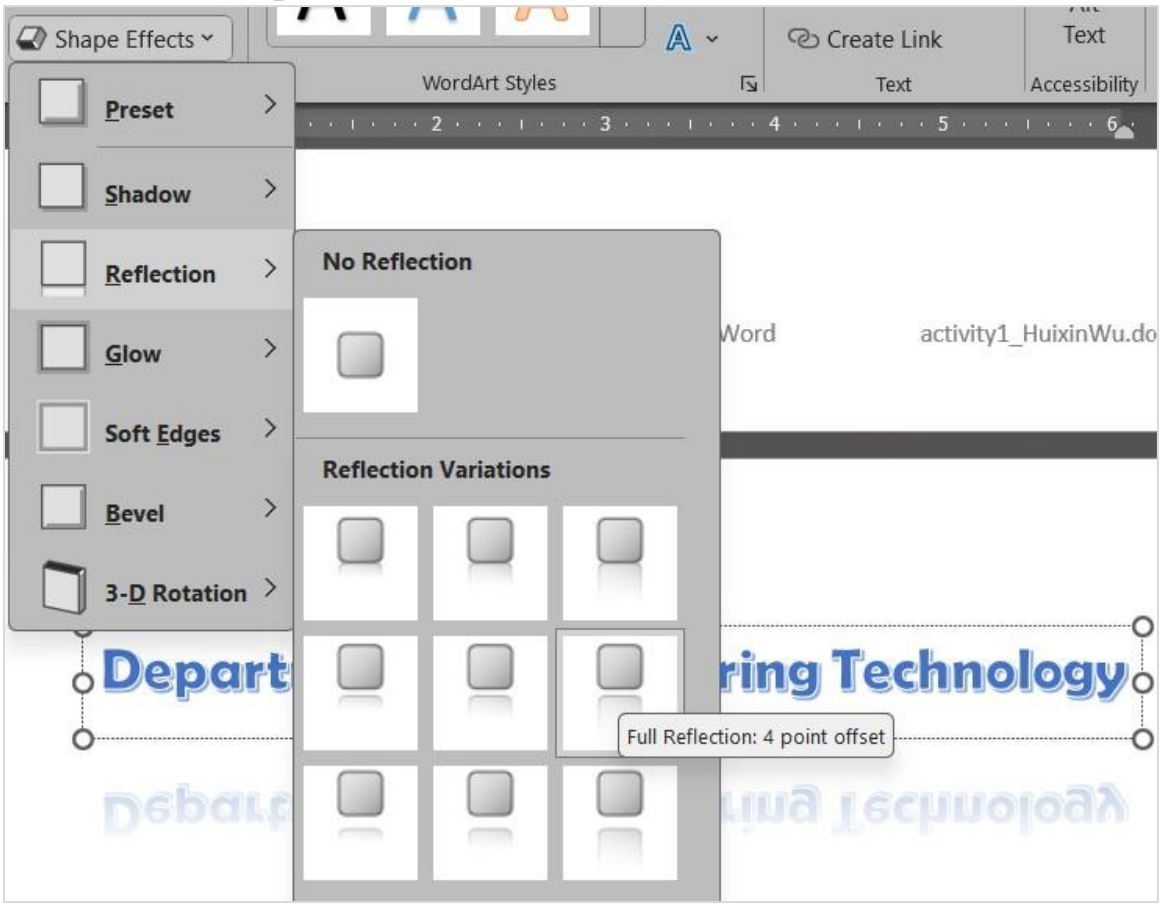

22. Double click on the WordArt and type *Department of Engineering Technology*.

23. With the WordArt selected, in the **Format** tab, go to the **Size** group and change the **Width** of the WordArt to **6.5”**
24. Change the WordArt font size to **25**, and the font family to **Berlin Sans FB**

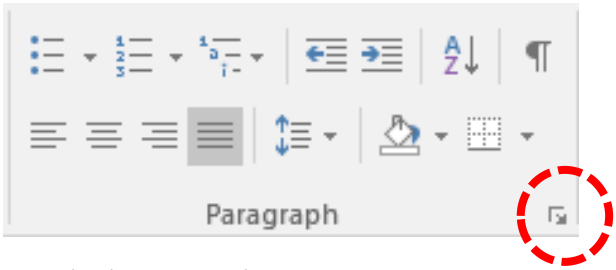

25. With the WordArt selected, in the **Format** tab, go to **Shape Styles** and click on **Shape Effects.** In the **Shape Effects** group, go to **Reflection** and select **Full Reflection, 4pt offset**

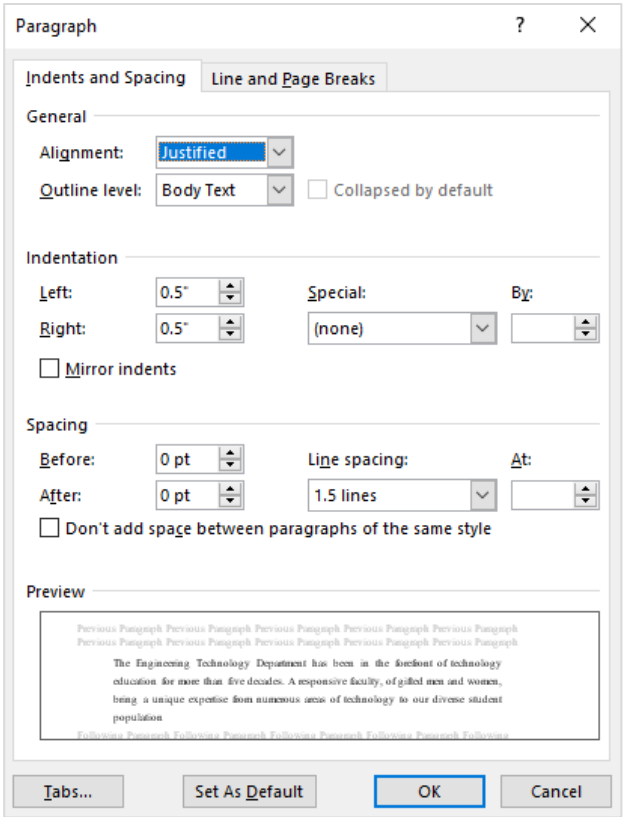

26. Click on the line below the WordArt and type the following paragraph:

The Engineering Technology Department has been in the forefront of technology education for more than five decades. A responsive faculty, of gifted men and women, bring a unique expertise from numerous areas of technology to our diverse student population through curriculum offerings that focus on today's increasingly sophisticated and technologically oriented world.

27. Select the previous paragraph, change the font family to **Courier Std**, font size **12**, align the paragraph to Justify, click on side arrow in the **Paragraph** group:

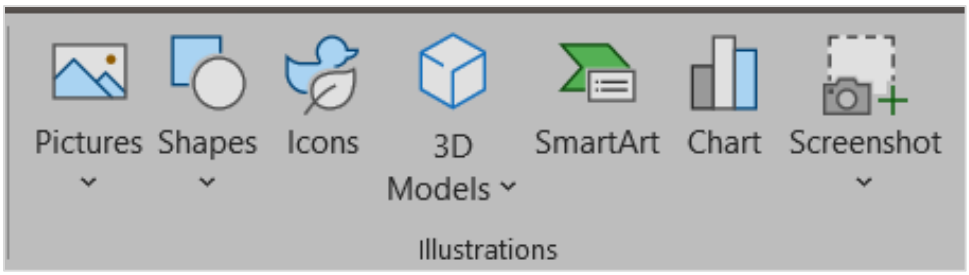

In the **Paragraph** window, set the **Left Indentation** to **0.5", Right Indentation** to **0.5"**, the **Line Spacing** to **1.5 lines**, and click **OK**

Your Word document should look like the following:

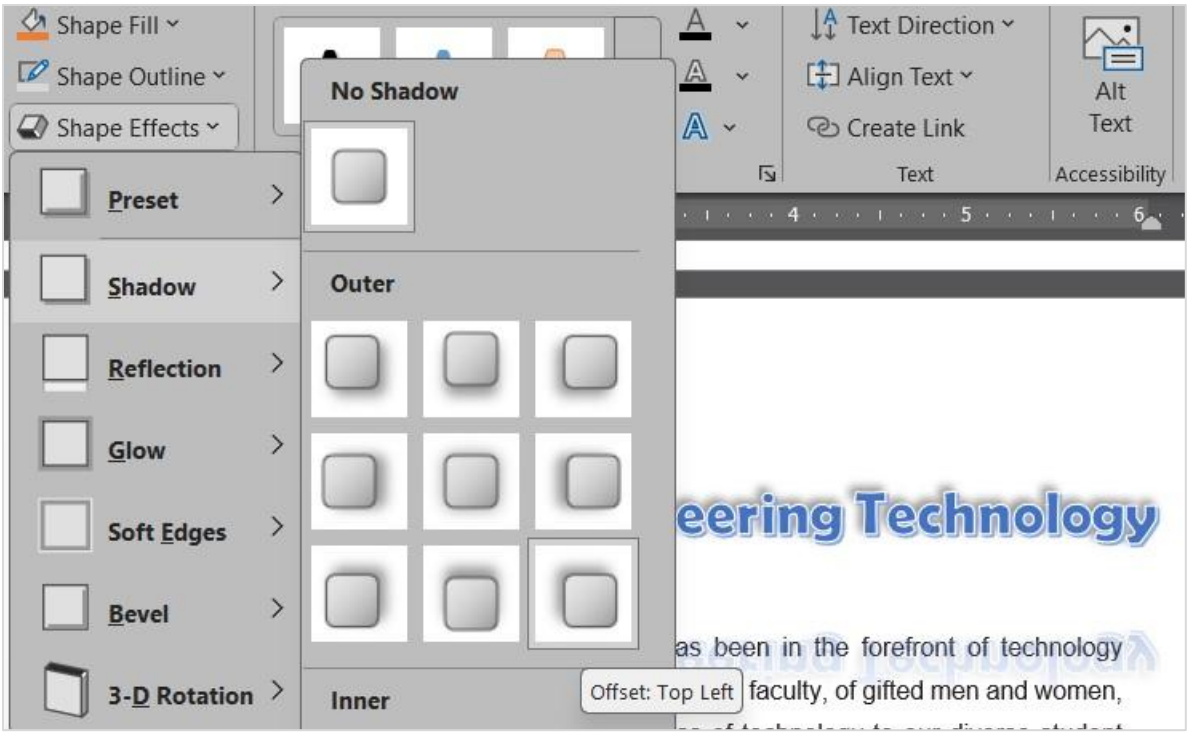

28. There are different ways to insert an image into a Word document. We can use the Drag-Drop technique or the Screenshot technique. Microsoft Word will take any of these two techniques as an object and not an image. To insert an image from a file, go to **Insert** tab, click on **Pictures** icon:

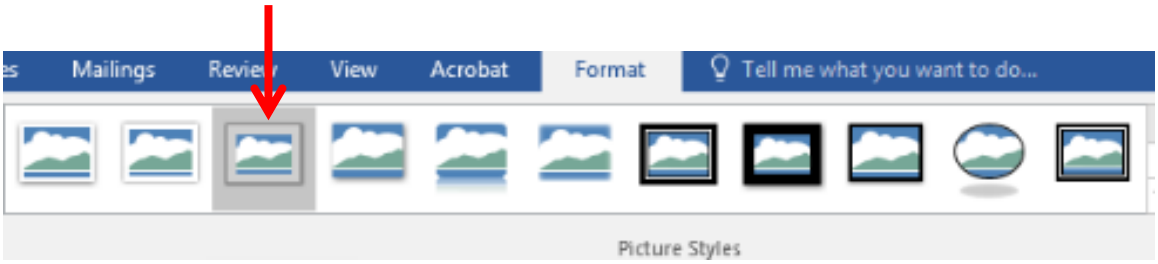

search for the image in the **Insert Picture** window, select the image that we want to insert, and click **Insert** button:

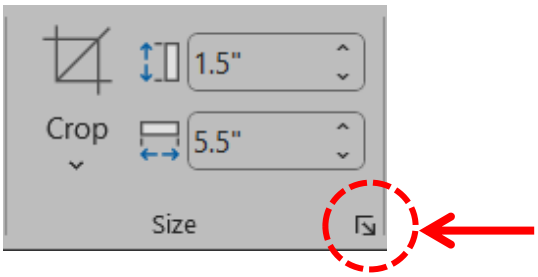

29. To format the image, select the image, click on **Format** tab, click the **Picture Effects** button, point to **Shadow**, and then click the last thumbnail **Offset Diagonal Top Left** under **Outer.**

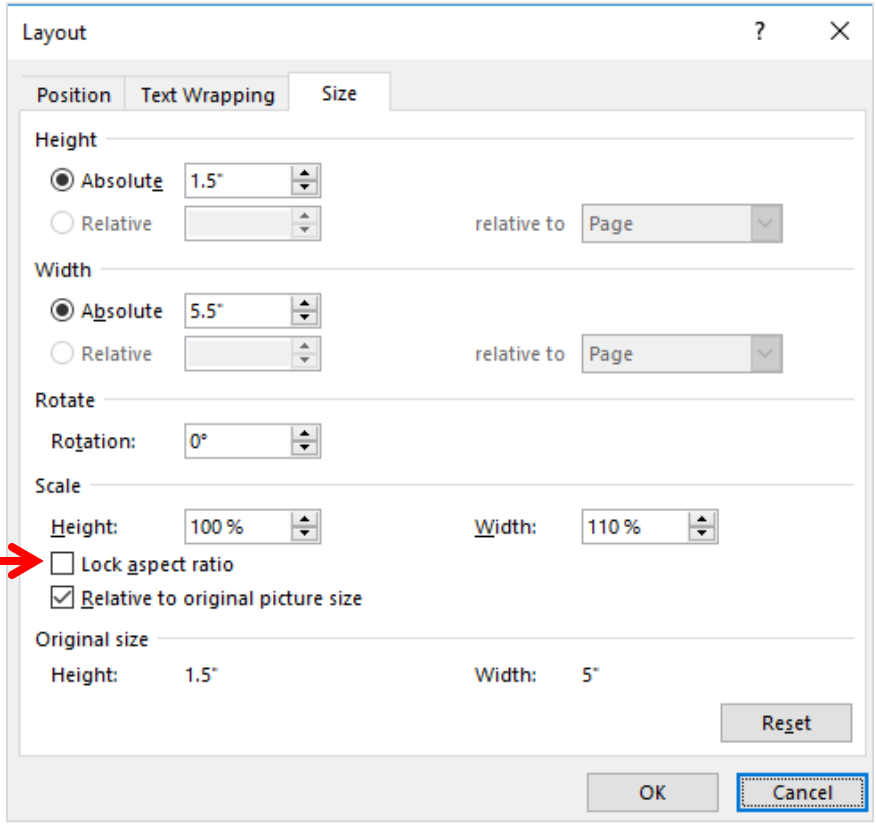

30. In the **Picture Styles** group, select **Metal Frame**

31. Set the image **Height** to **1.5”** and the **Weight** to **5.5”**. If the size ratio is proportional, open the **Advanced Layout Size** window by clicking on the side arrow located at the bottom-right corner:

32. In the **Layout** window, unchecked the **Lock aspect ration**

Your document should look like the following:

Bulleted list is a list of items with each item introduced by a symbol – such as a small circle or check mark – in which the list items can be presented in any order.

33. Click twice the **Enter** key after the image, and type the following:

The department of Engineering Technology is home to all the technology programs and offers eight Associate degrees:

Computer Engineering Technology

Electronics Engineering Technology

Mechanical Engineering Technology

Architectural Technology

Internet and Information Technology

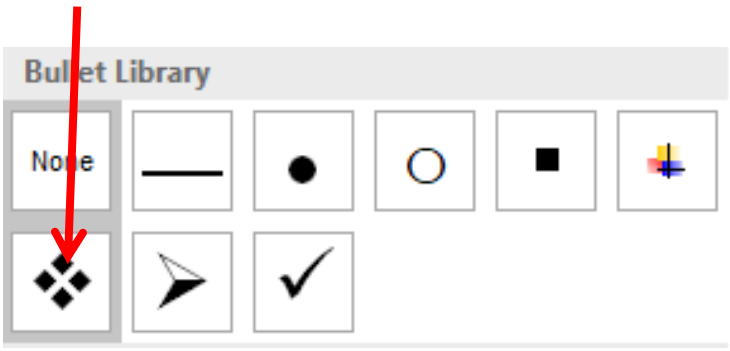

Telecommunication Technology

Engineering Science

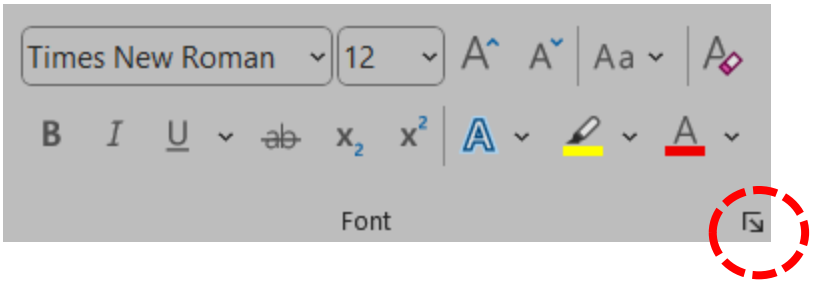

Computer Science and Information Security

34. Select the eight degrees, go to the **Home** tab, in the **Paragraph** group, click the **Bullets** arrow.

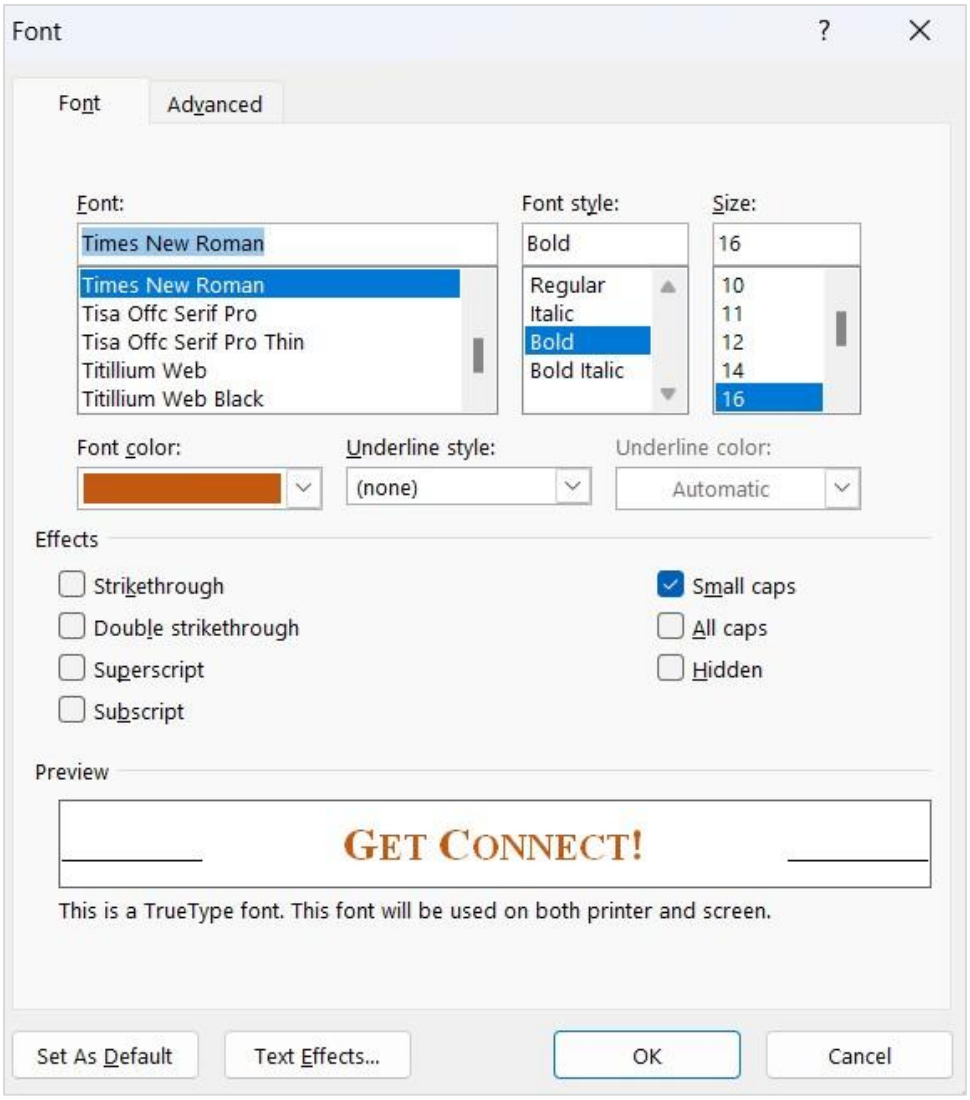

35. In the **Bullet Library**, select the **diamond** figure

36. After the bullet list, type: *Get Connect!* and tab **Enter**
37. Select the words *Get Connect!*, click on the side arrow in the **Font** group

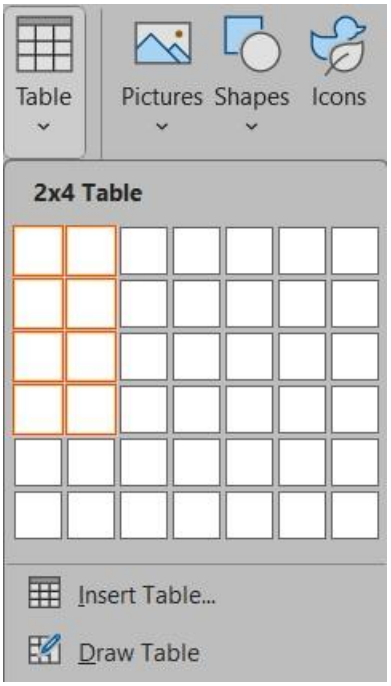

38. In the **Font** window, change the font size to **16**, the **Font color** to **Orange, Accent 2, Darker 25%**, check the **Small caps** effects, and click **OK**.

Because tables can hold text, numbers, or graphics, they are often used to lay out and summarize data. You can format each table element individually, or you can apply table styles to the entire table.

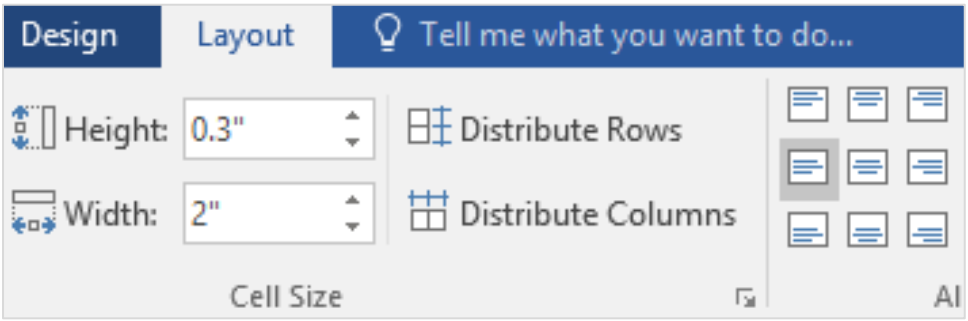

39. Insert 2 columns and 4 rows table. Go to **Insert** tab, click on the **Table** icon, in the **Insert Table** window, use the mouse to select a 2 by 4 cells, and then click to create the table:

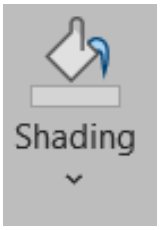

40. Type the following information in the table:

Department Contact Info	
Location	Technology Building, T-20 222-05 56th avenue, Bayside, NY 11364
Office Phone Number	(718)631-6207
Email	hnamdar@qcc.cuny.edu

41. Select the left column and set the **Width** to **2”**, the **Height** to **0.3”,** and the **Alignment to Align Center left.** Also, **Bold** the text in this column.
42. Select right column and set the **Width** to **2.5”**, the **Height** to **0.3”,** and the **Alignment to Align Center left.**

43. Select the first row of the table, go to the **Design** tab, in **Table Styles** group, click the **Shading** arrow, and select the color – **Gold, Accent 4, Darker 25%.** The shading icon is shown in the image below:

44. With the first row still selected, merge the cells by going to **Layout**, and click on **Merge Cells** icon. The merge cells icon is shown in the image below:

Also, go to **Home** Tab **Bold** and apply **Small Cap** effect to the first row.

45. Select the other three cells in the left column, with the three cells selected, click on the **Shading** icon, and select the lighter gold color, **Gold, Accent 4, Lighter 80%**
