Lab Experiment 7

Create a technical and dynamic presentation using Microsoft PowerPoint

Image 1: logo of Microsoft PowerPoint

Microsoft PowerPoint is an essential tool for organizing and presenting academic content in a clear and professional manner. Whether delivering class presentations, group projects, or research findings, students can use PowerPoint to highlight key points through bullet lists, visuals, and data charts. The software supports collaboration, allowing students to co-create slides in real time and share their work easily. Its design templates and multimedia capabilities also help students enhance the visual appeal of their work, making presentations more engaging and impactful in both virtual and in-person settings.

The file document extension of Microsoft PowerPoint is **.pptx**

Learning Outcomes

Upon completing this activity, students will be able to:

1. **Create and Format a Presentation**

   - Demonstrate the ability to create a professional PowerPoint presentation, including selecting and applying design themes, formatting text, and customizing slide backgrounds.

2. **Incorporate Visual Elements**

   - Insert and format a variety of graphic elements, including clip art, shapes, text, videos, and SmartArt, to enhance the visual appeal and effectiveness of the presentation.

3. **Apply Animation and Transitions**

   - Use animation effects and slide transitions to create dynamic and engaging presentations, enhancing audience interaction and focus.

4. **Present Data Effectively**

   - Insert and format tables and charts (such as pie and column charts) to present data in a clear and visually appealing manner, ensuring data is easy to understand for the audience.

5. **Enhance Communication Through Design**

   - Utilize appropriate design elements, such as styles, WordArt, and multimedia, to enhance the clarity and impact of a presentation, ensuring it communicates key messages effectively.

6. **Demonstrate Proficiency in Presentation Tools**

   - Demonstrate proficiency in navigating PowerPoint's various views (Normal, Slide Sorter, Reading, and Slide Show) to efficiently create and present a polished presentation.

Lab Exercise

Complete the following skills from the lab activity:

- **Skill 1**: Creating and Formatting Slides. Students will build a 6-slide presentation on the ET Department and QCC Art Gallery using design themes, styled backgrounds, WordArt, and formatted lists.
- **Skill 2:** Using Graphics in Presentations. Students will create a 5-slide presentation on Student Club benefits, adding and formatting clip art, shapes, SmartArt, and videos.
- **Skill 3:** Presenting Data with Tables and Charts. Students will edit a presentation on QCC Tuition Fees using tables, pie charts, and column charts to display data effectively.
- **Skill 4:** Adding Animations and Transitions. Students will enhance presentations with slide transitions and animation effects for a dynamic visual experience.

Deliverables

- Submit your completed lab exercise or responses as instructed by your instructor.

Introduction

Microsoft PowerPoint is a presentation graphics software program designed to help users effectively communicate information to an audience through electronic slide presentations and handouts. PowerPoint presentation files typically use the **.pptx** file extension.

There are several views in PowerPoint that serve different purposes:

Normal View: This is the default view, used for creating, editing, and formatting your presentation.

Slide Sorter View: Displays thumbnails of your slides, making it easy to sort and organize the sequence of your slides as you prepare them for presentation or printing.

Reading View: Allows you to view your presentation as it would appear in "Slide Show View," but within the application window instead of full screen.

Slide Show View: Used to display your presentation on a screen for an audience, showing the slides in full-screen mode.

Lab Activity: Microsoft PowerPoint Skills

At the end of this activity, students will be able to:

Skill 1: Creating and Formatting a PowerPoint Presentation
Students will create a new presentation introducing the ET Department and the QCC Art Gallery. They will start with a blank presentation, apply a design theme, and create six slides. Students will format slide backgrounds with styles, pictures, and textures, insert and format text using WordArt, and modify bulleted and numbered lists.

Skill 2: Enhancing Presentations with Graphics
In this exercise, students will create a presentation describing the benefits extended to members of Student Clubs at QCC. They will apply a design theme, create five slides, and insert and format clip art, shapes, and text. Students will also learn to align and resize graphics, as well as insert and format videos and SmartArt.

Skill 3: Presenting Data with Tables and Charts
This skill focuses on creating a presentation about Tuition Fees at QCC. Students will edit a presentation summarizing tuition fee categories and financial aid requirements. They will insert and format tables, pie charts, and column charts to present data clearly.

Skill 4: Creating Dynamic Slides with Animation Effects and Transitions
Students will apply animation effects to individual slides and transitions between slides to create a more dynamic and engaging presentation.

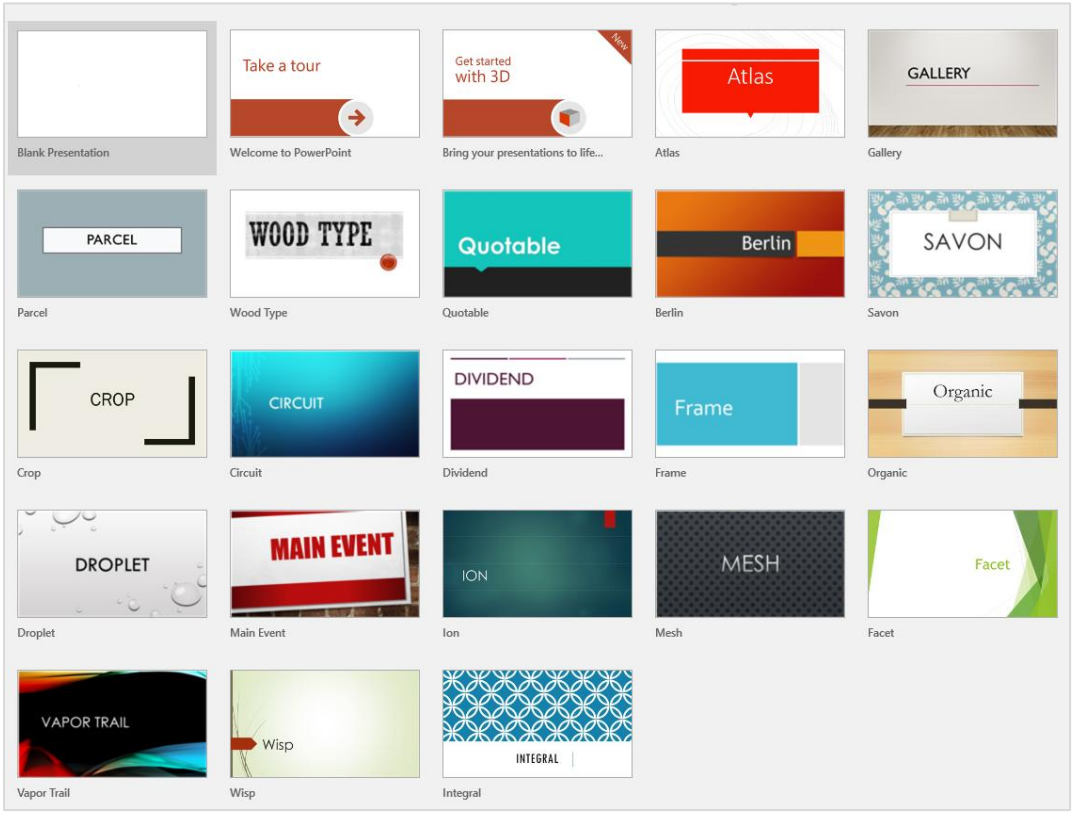

Skill 1: Formatting a PowerPoint presentation

When you start PowerPoint, you can search for available templates and themes to find a look that fits your presentation needs. By default, PowerPoint selects a *Blank Presentation* among the templates.

Procedure to complete skill 1:

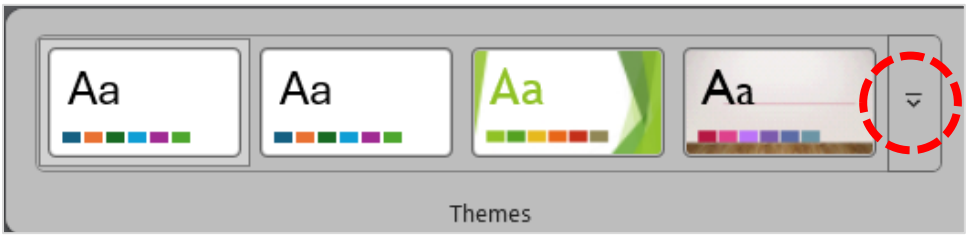

Selecting Slide Theme

1. Start **PowerPoint** and save the .pptx as *PowerPoint_Activity1_StudentName.pptx*
2. On the **Start screen**, view the templates available on the right side of the screen

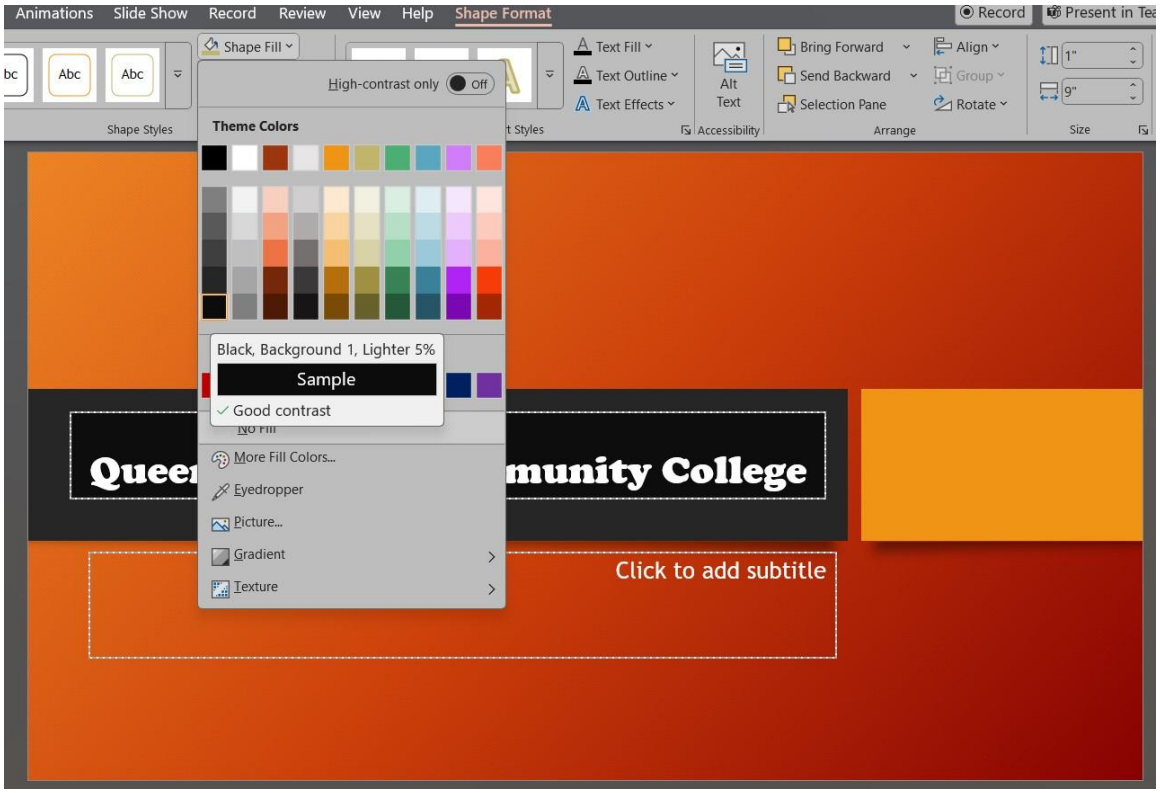

3. From the selection, double click the **Berlin** theme to select it.

4. If you want to change the theme design, you can go to **Design** tab and click the More arrow to view and select a new theme:

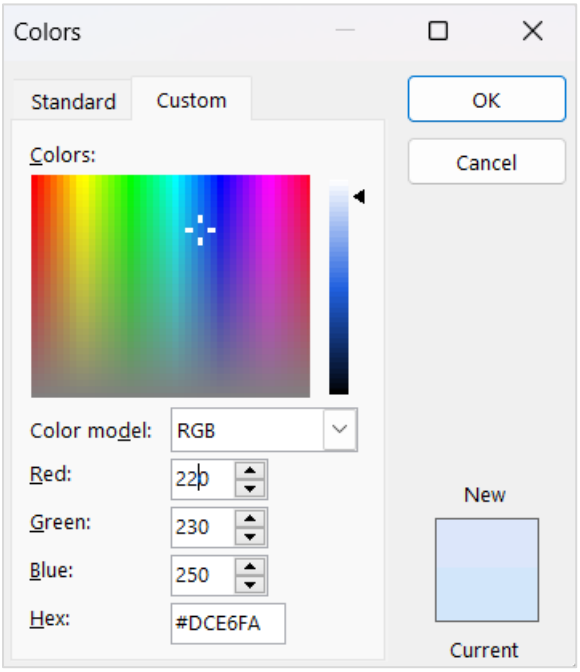

Change font colors and effects

5. Click in the title placeholder and type *Queensborough Community College*.
6. Select the title, go to **Home** tab and in the **Font** group, change the font family to *Cooper Black*, font size to *34*, and font style to *Text Shadow*.
7. With the title still selected, go to **Shape Format** tab and change the *Height* to *1"* and *Width* to *9".* With the hold-drag technique, center the title to the middle of the slide.
8. Within the **Format** tab, from the *Shape Styles* group, click on the *Shape Fill* down arrow and select the color *Black, Background 1, Lighter 5%*

9. Click in the subtitle placeholder and type *ET Department.*
10. With the subtitle selected, change the font size to 60, font style to *Bold* and *Text Shadow*, and *Center* the subtitle. Also, click on the *Font Color* arrow to open the **Theme** color window. In the Theme color window, click on the **More Colors…** link to **Colors** window. In the Colors window, click on the **Custom** tab and change the color value as:
    - Red: 220
    - Green: 230
    - Blue: 250

Click **OK** when the colors are set.
Click on **Save** icon.

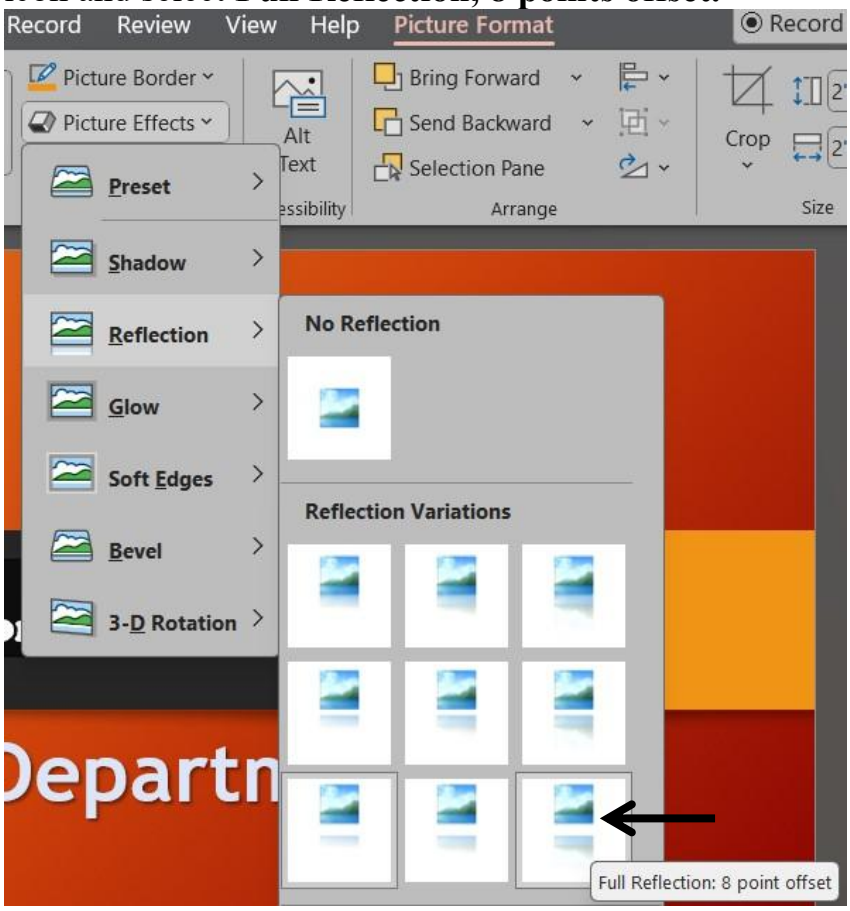

Insert and format an online picture

11. To insert an image of QCC to the first slide, we go to **Insert** tab, click on the **Pictures** icon to open the *Insert Picture From list***.** From the *Insert Picture From,* click on **Online Pictures…**

12. In the **Insert Pictures** window, type *QCC* in the Search engine and press Enter. From the list of images, select a QCC logo.

13. With the QCC logo still selected, go to **Format** tab and change the **Width** and **Height** to 2". Also, click on **Picture Effects,** go to **Reflection** icon and select **Full Reflection, 8 points offset.**

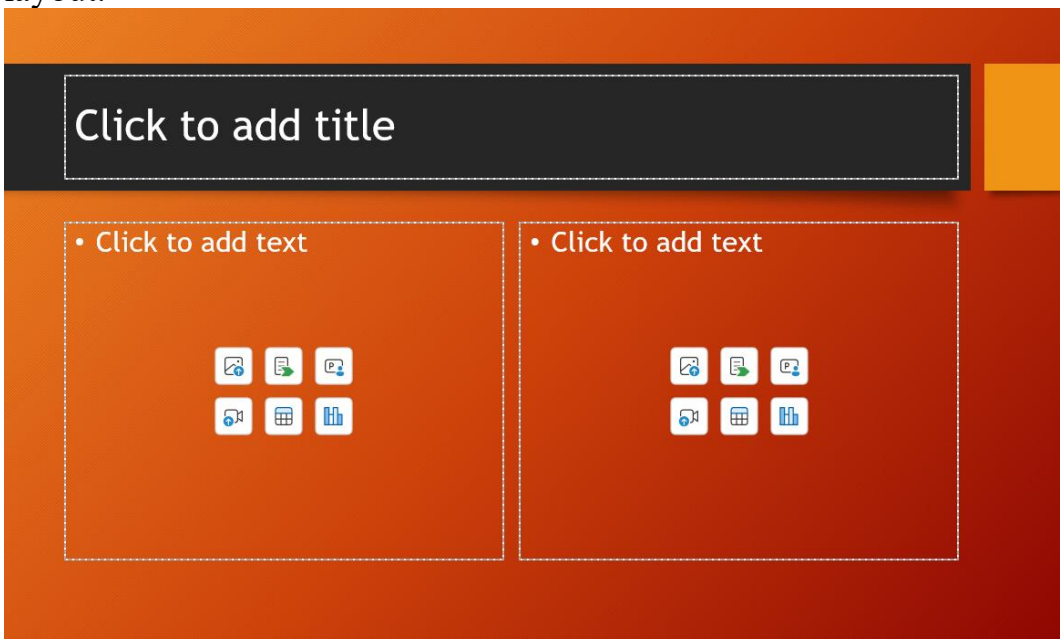

Move the QCC logo to the upper left of the slide show.
Click on **Save** icon

The first slide should look as:

Create a new slide

14. On the **Home** tab, in the **Slides** group, click the **New Slide** arrow. Click the **Two Content** thumbnail to insert a slide with the *Two Content* layout.

15. In this second slide, type *Welcome to ET Department* in the title placeholder.
16. With the title still active, set the font style as **Bold**.
17. In the left content placeholder, delete the bullet point by using the *backspace* key. After it, type the following paragraph:
    Welcome and thank you for visiting the Engineering Technology Department at Queensborough Community College. Whether you are a current or prospective student, I am sure you will find the material on this slideshow helpful.
18. With the left column still active, change the font size to *25,* and font type to *Trebuchet MS*
19. Click on the right placeholder, delete the bullet and type the following lines:
    Department Facilities:
    Computer and Electronic Laboratories

    Networking and Internet Technology Laboratories

    Mechanical and Manufacturing Laboratories

    Solar Panels

    3D printing Laboratories

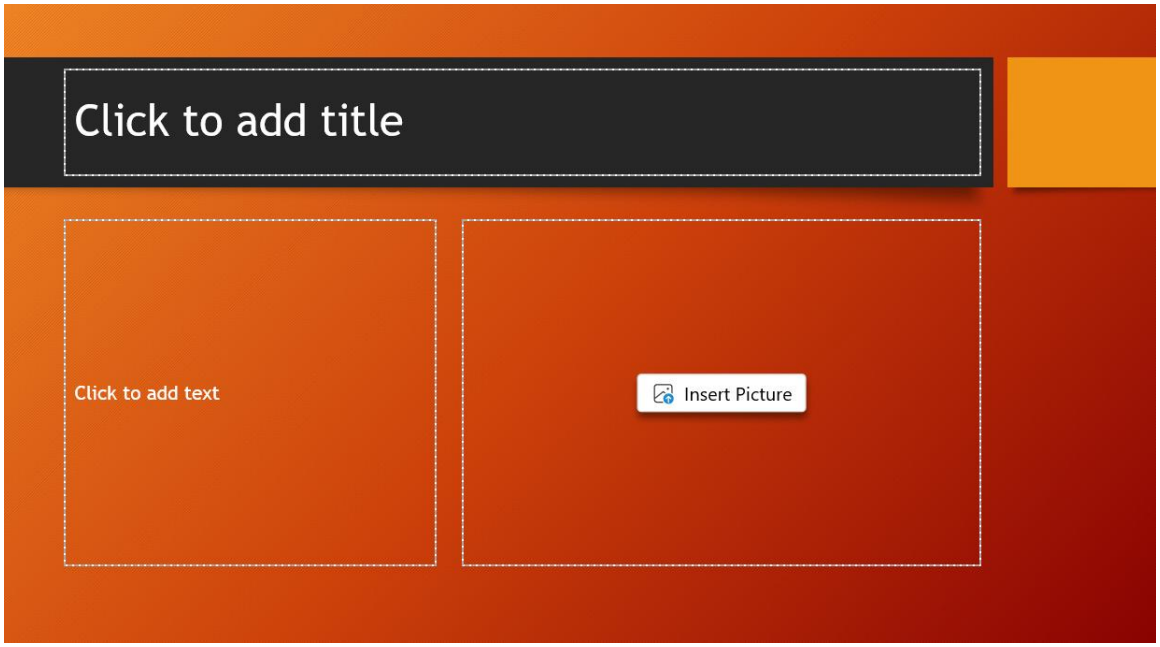

20. With the right column still active, change the font size to *25,* and font type to *Trebuchet MS.*
21. Select the first line and set the selected text to **Bold**
22. Select the text from the second line to the last line in the right column, then click the ***Bullet*** icon to format the selected lines as a bulleted list.

23.. The second slide should look as follows:

24. On the **Home** tab, click on the **New Slide** arrow from the **Slides** group. In the gallery, click on the **Picture with Caption** slide.

25. Click on the title placeholder and type *Engineering Technology Department.* Also, set the title to **bold**.

26. Click on the text placeholder of the left column and type: *We are glad to have you on our team!*. Change the text font size to *25*
    In the right column, click the ***Insert Picture*** tab. From the dropdown menu, select ***Search on the Web***. In the Bing search box, type *team work*, then choose an image from the search results.
27. Click the **Save** icon, or by using the combination key Ctrl + s, to save your work.

The third slide should look as follows:

Change Themes and Variants to a specific slide

28. Insert a new slide using the **Picture with Caption** layout as the fourth slide.
29. On Slide 4, go to the **Design** tab. In the **Themes** group, click the **More** arrow, hover over the available themes, and locate the **Metropolitan** theme. Right-click on **Metropolitan**, select **Apply to Selected Slides**, and click to apply it.
30. In the **Variants** group, click the **More** arrow, then select the **Dark Red** variant.

31. Click on the title placeholder and type: *Questions and Concerns?*. Also, set the title to **bold** and the font size to **50.**
32. Click on the text placeholder and type: *Please ask at any time.* Change the text font size to ***35.***
33. Click the ***Insert Picture*** tab. From the dropdown menu, select ***Stock images***. In the *Search Stock Images* box, type *Great job*, then choose an image from the search results. After the image is selected, click on the **Insert** button.
34. Click the **Save** icon, or by using the combination key Ctrl + s, to save your work.

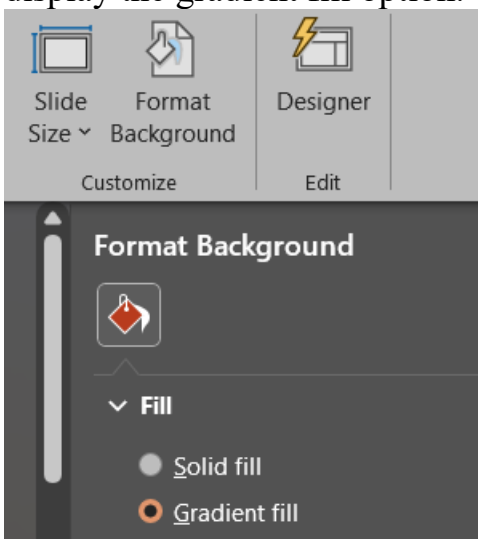

The fourth slide should look like the following image:

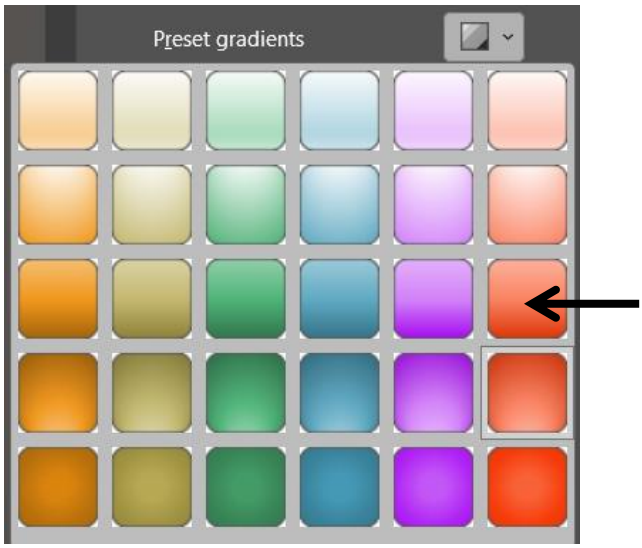

Format slide background with fill

You can customize the presentation design by changing the background of your slides. Modifications to slide backgrounds can be applied to a single slide or to all of the slides in the presentation.

35. Move and click on slide 1. On the **Design** tab, in the **Customize** group, click **Format Background** to display the Format Background pane.
36. In the **Format Background** pane, under **Fill**, select **Gradient Fill** to display the gradient fill option.

37. Click the **Present gradients** button, and then select the color **Medium Gradient – Accent 6**

38. Click the **Save** icon, or by using the combination key Ctrl + s, to save your work.

The modified first slide should look like the following image:

Add Pictures and Textures to Slide Background

39. Add a new **Blank** layout slide as the fifth slide.
40. With the fifth slide displayed, on the **Design** tab, in the **Customize** group, click the **Format Background** button. In the **Format Background** pane, under **Fill,** select **Picture or texture fill.**
41. Under **Picture source**, click **Insert** tab to open the *Insert Pictures* dialog box.
42. In the *Insert Pictures* dialog box, click on **Online Pictures**, and type *AI* in the **Search Bing** box.
43. Select an *AI* image from the list and click the **Insert** button.
44. Under the **Design** tab, in the **Format Background** pane, in the **Transparency** slide bar, change the transparency to ***60%.*** Alternately, drag the Transparency slider to the right, use the up or down arrows to adjust the transparency percentage, or type 60%.
45. To insert a Text Box, go to **Insert**, click on the **Text Box** icon and draw a Text Box at the bottom of slide.

46. Change the text box font family to **High Tower Text,** and the font color to **Black**. Then, type the following in the text box: *Artificial Intelligence, AI*.
47. Press Enter and type a second sentence as:
AI is transforming industries by enabling machines to think and learn.

48. Select the first line in the text box and change the font size to **50** and the font style to **Bold.** Select the second line and change the font size to **30** and the font style to **Bold** and **italic.**

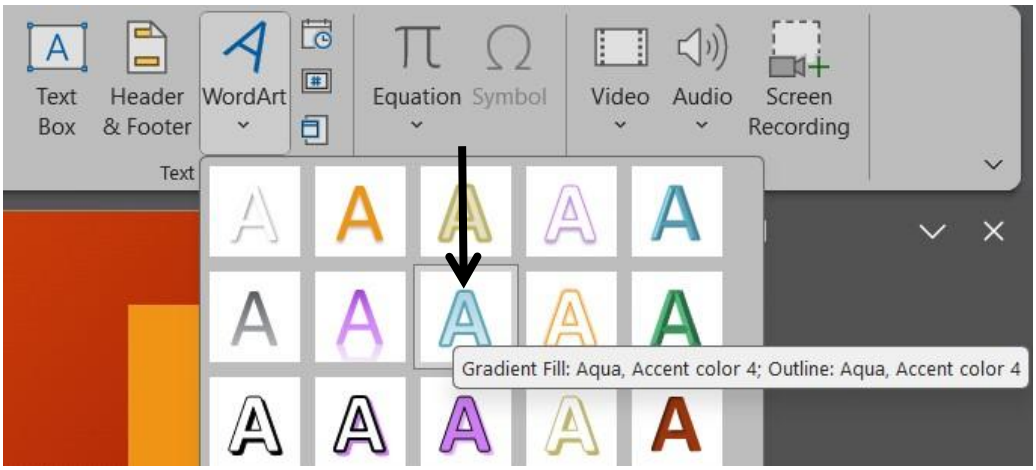

49. Save your work.

The fifth slide should look like the following image:

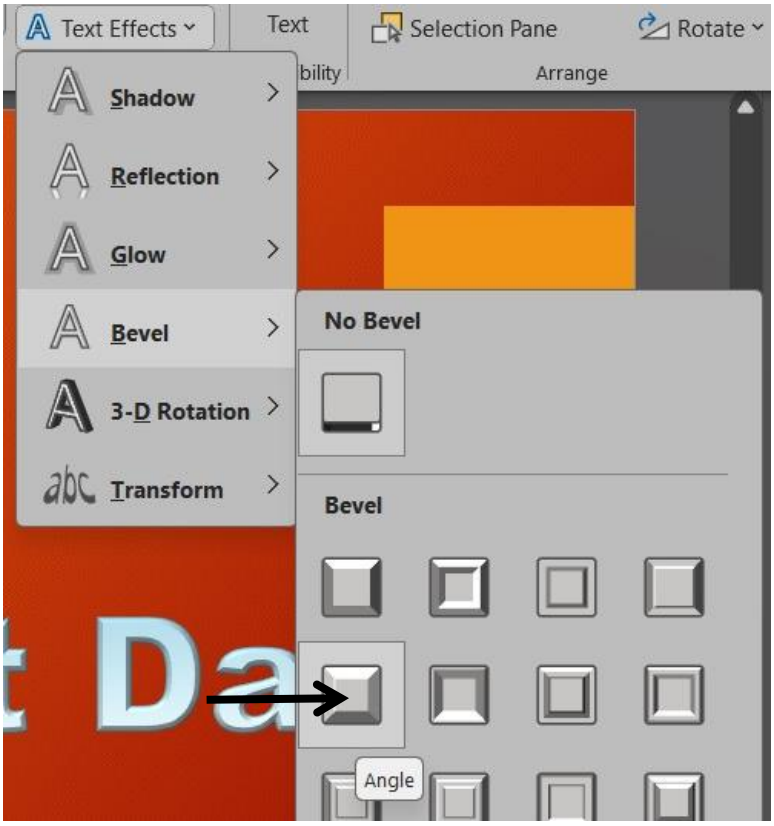

Format Text with WordArt

50. Add a new Blank slide as the sixth slide. Alternatively, you can add a new blank slide by clicking on the fifth slide and pressing the Enter key.
51. In the sixth slide, in the **Insert** tab, under the **Text** group, click **WordArt** button. In the **WordArt** gallery, click on the **Gradient Fill – Aqua, Accent color 4; outline: Aqua, Accent color 4**

52. Center the WordArt, type *Have a Great Day!*, and change its font size to **80** and font family to **Arial Black**.
53. With the WordArt still selected, in the **Shape Format** tab, under the **WordArt Styles** group, click the **Text Effects** tab. Hover to several of the options to view the available galleries. Hover on **Bevel,** then hover to different options to preview the effect in the text, and then click on the **Angle** effect:

54. Click the **Text Effects** tab again, hover to **3-D Rotation**, hover to different 3D rotation effect to preview the effect on the text. Select the **Perspective Relaxed Moderately** effect which is located under **Perspective** list**.**
55. Save your work.

The sixth slide should look like the following image:

Skill 2: Enhance presentation with graphics

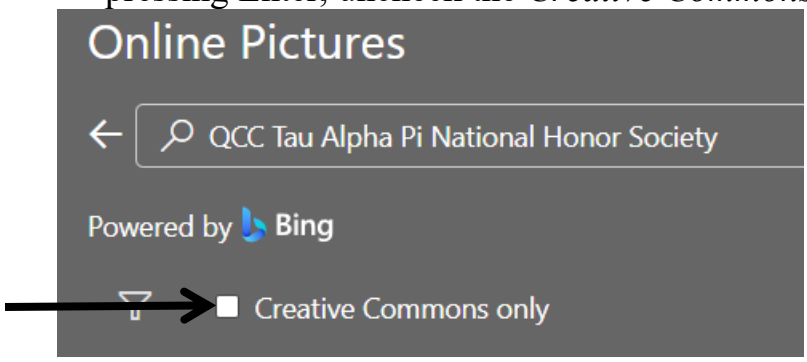

Insert and format Template

1. Start a new PowerPoint presentation with the **Wood Type** template. Save the file as *PowerPoint_activity2_StudentName.pptx*
2. In the **Title** placeholder, type *Student Activities* and then in the subtitle placeholder, type *Clubs and Societies*. Also **Bold** the text of the subtitle and change the font size to **38.**
3. On the **Home** tab, click the **New Slide** arrow, and then in the gallery, click **Two Content** slide.
4. In this second slide, in the title placeholder, type *ET Clubs, Societies, and Awards*. Set the title font size to **50** and apply **bold** formatting.
5. In the left placeholder, remove the bullet list, type *ET Clubs,* and set the text to **Bold** and the font size to **25.**
6. Insert **Start Bullets,** press **Tab** key to increase the list level and type:
   - *Architecture Club*
   - *IEEE Club*
   - *ET Programming Club*
   - *Mechanical Engineering Technology Club*
   - *Robotics Club*
   - *The Gaming Club*
7. After the last item in the bullet list, hit twice the **Enter** key, and move the align arrow to the beginning of the left alignment ruler:
8. Type *ET Student Societies,* and set the font size to **25** and apply **bold** formatting.
9. Insert a **Start** Bullet**,** press **Tab** key to increase the list level and type: *Tau Alpha Pi National Honor Society*. The left content should be as the following image:

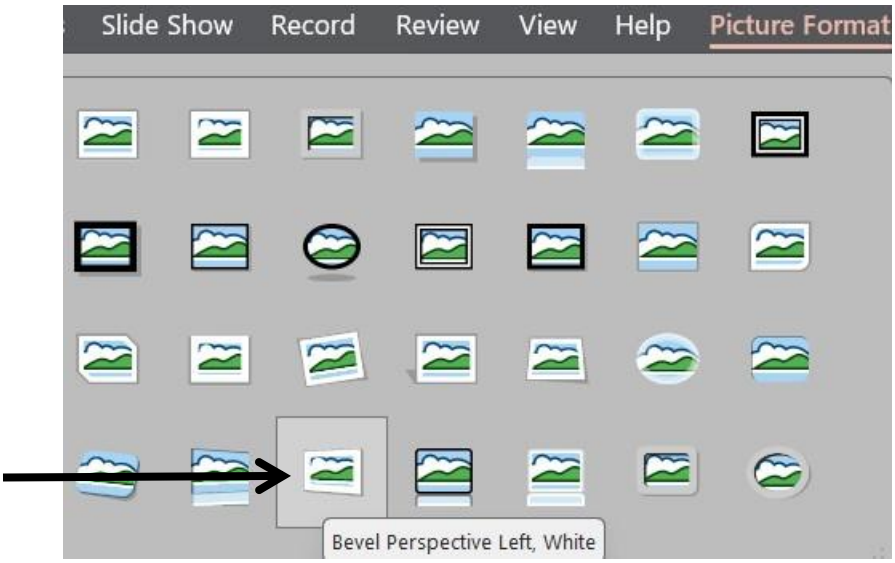

Insert and Format Online Picture

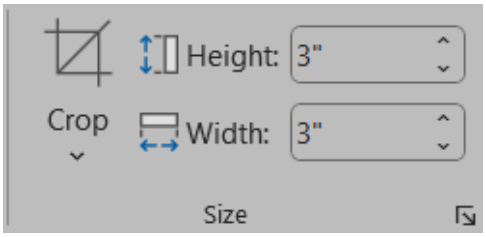

10. In the right placeholder, click on the **Pictures** icon, and click on **Search on Web.** In the Search Bing, type *QCC Tau Alpha Pi National Honor Society* and press Enter. If you don't see an image from QCC, before pressing Enter, uncheck the *Creative Commons only* box.

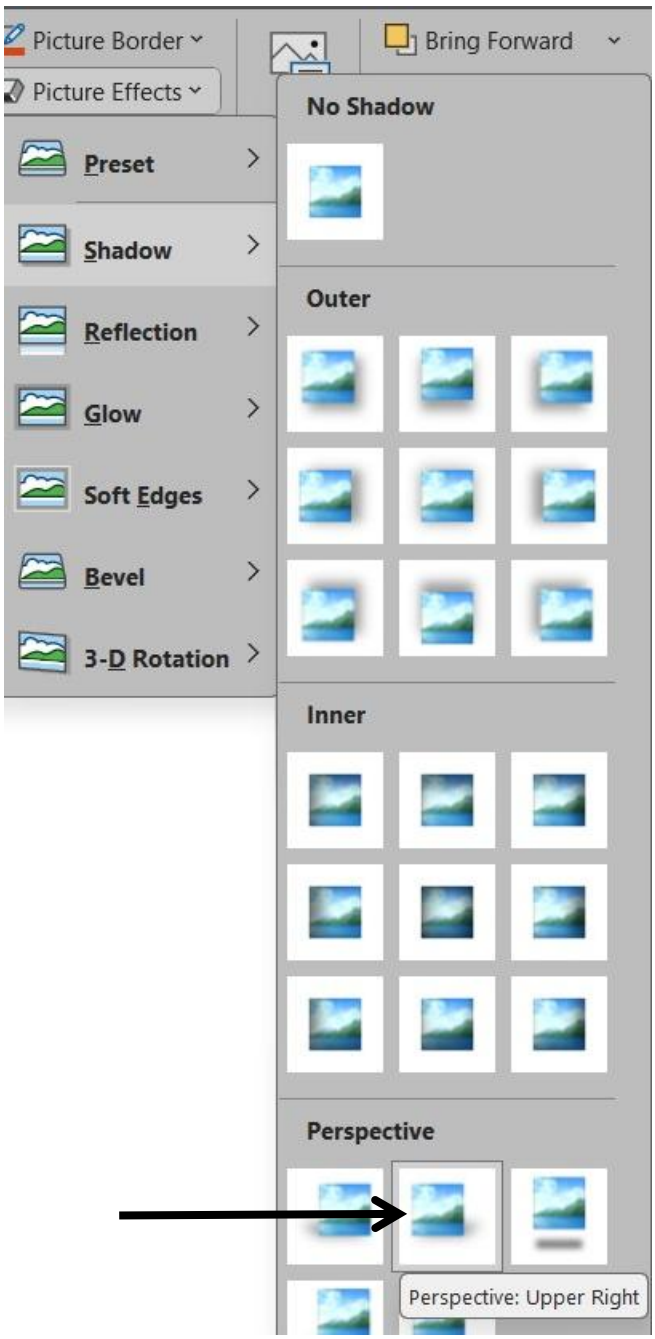

11. Pick one image from the searched list and click the **Insert** button.
12. With the picture still selected, under the **Picture Format,** click in the **Picture Styles** arrow group and select **Bevel Perspective Left, White**

13. Change the picture height and width to 3" by 3"

14. Click **Picture Effects** arrow, hover the **Shadow** icon, move the mouse to the **Perspective** group, and click on **Perspective: Upper Right** icon

15. Save your work.

The second slide should look as:

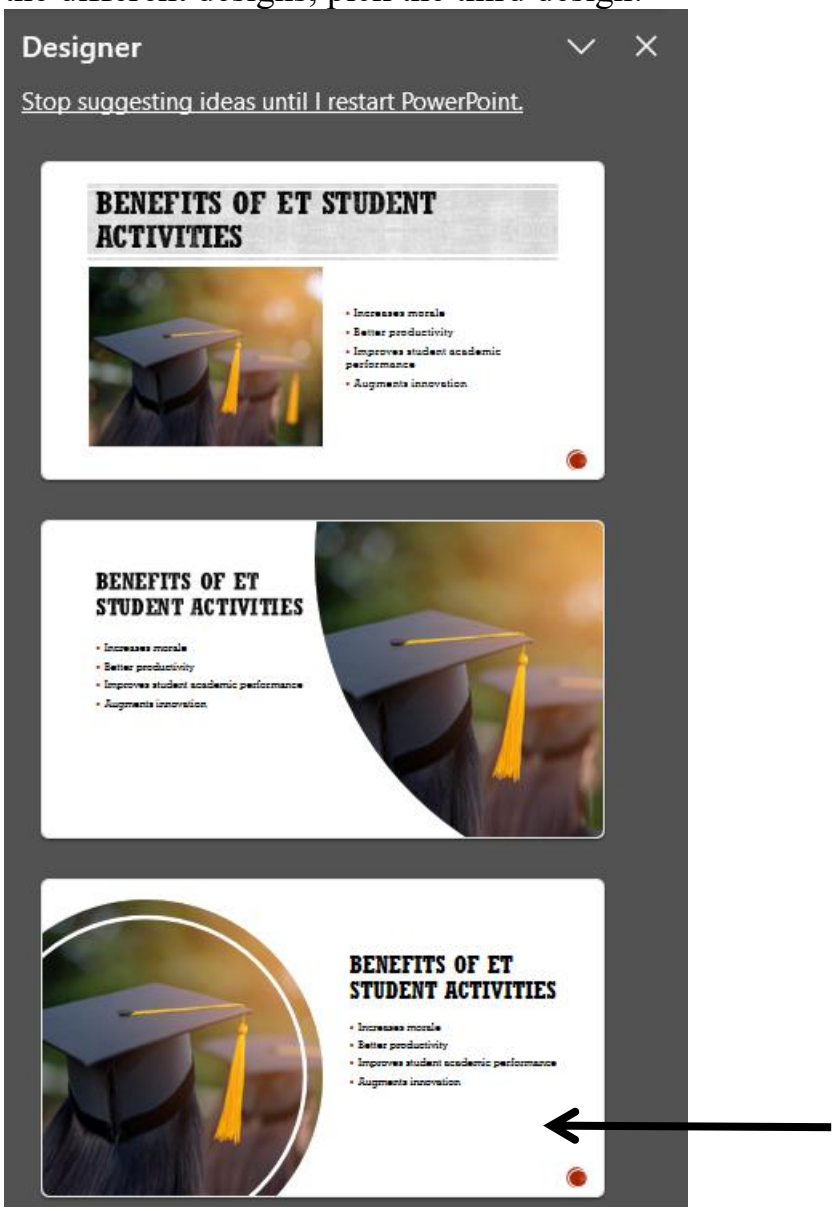

Add and modify shapes, borders, and effects

16. On the **Home** tab, click the **New Slide** arrow, and then in the gallery, click **Two Content** slide.
17. In this third slide, in the title placeholder, type *Benefits of ET Student Activities*. Set the title font size to **50** and apply **bold** formatting. Modify the title width so that the entire title fits on one line.
18. In the left content placeholder, type each sentence as list with font size of **25**:
    Increases morale
    Better productivity
    Improves student academic performance
    Augments innovation

19. In the right placeholder, click on the **Pictures** icon, and click on **Stock images.** In the Search Stock images box, type *success* and press Enter.

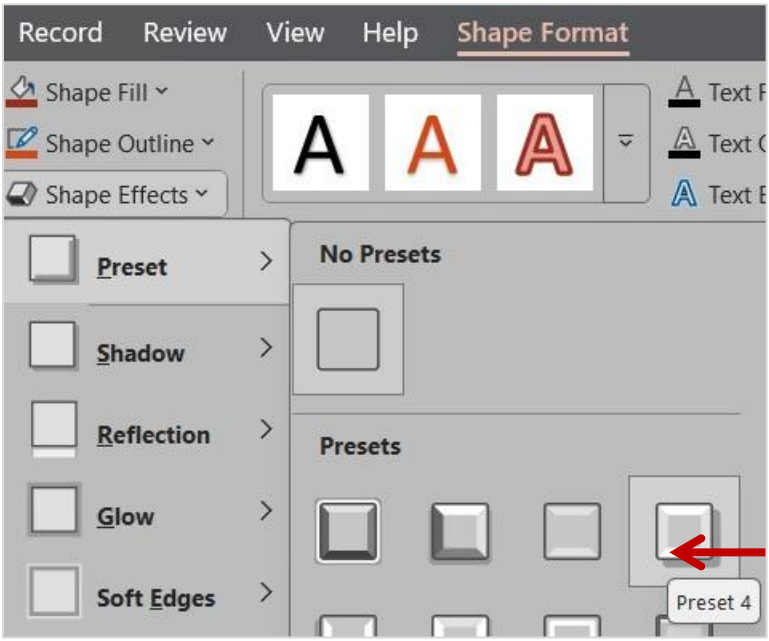

20. After inserting the image, a **Designer** column will open, from the list of the different designs, pick the third design:

If the **Designer** column does not appear, simply keep the slide design from the previous step, **Step 19**.

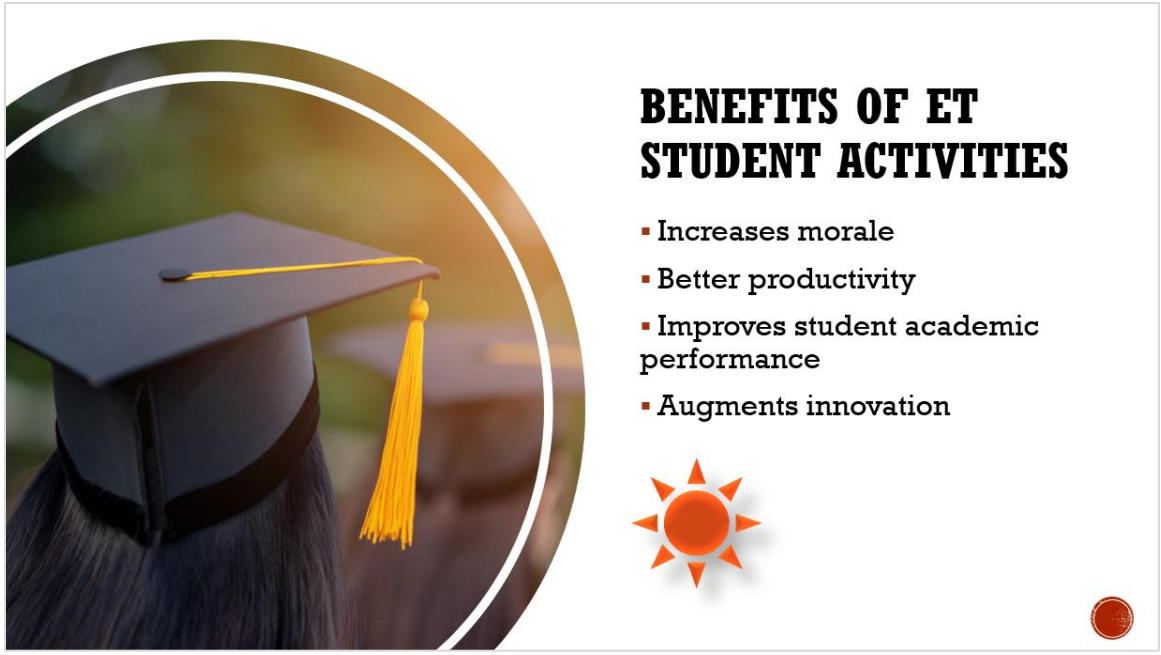

The next step is to insert a cross shape on the third slide, placing it after the bullet list.

21. Click the ***Insert*** tab. Under *Illustrations*, click the ***Shapes*** icon to open the shapes list. Then select the ***Sun*** shape from the *Basic Shapes* group.
22. To place the shape, click, hold and drag the shape after the bullet list.
23. With the shape still selected, change the shape *Width* to **1.5** and the shape *Height* to **1.5**.
24. With the shape still selected, on the **Shape Format** tab, under the **Shape Styles** group, click the **Shape Effects** button. Hover to **Present** to open a present effects, then hover to each thumbnail to preview the effects on the image using live preview. Click on **Present 4** style.

25. Save your work.

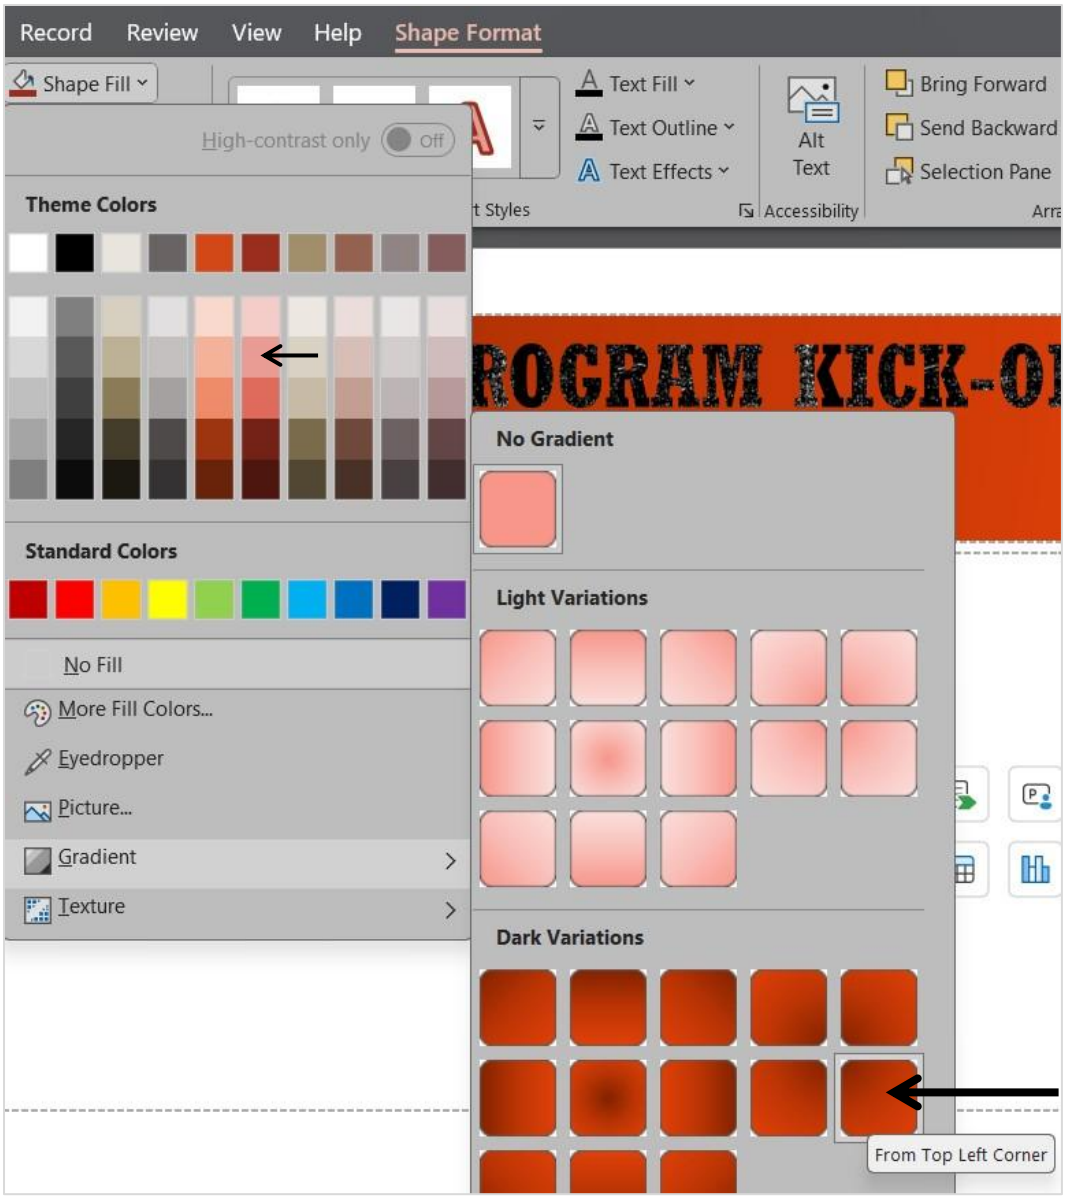

The third slide should look as:

Convert Text to SmartArt Graphics

SmartArt graphics is a visual representation of information that can be used to communicate your message or ideas effectively.

26. On the **Home** tab, click the **New Slide** arrow, and then in the gallery, click **Two Content** slide.
27. In the title placeholder, type *Enrichment Program Kick-off Awards*. Set the title font size to **50**, apply **bold** formatting, and change the Font color to white.
28. With the title still selected, in the **Shape Format** tab, under the **Shape Styles** group, click on the **Shape Fill** arrow, hover in **Gradient**, and select **From Top to Left Corner**

29. In the left content placeholder, type to the following content with its respective bullet list:

ET awards

- *Electronic Engineering Technology Award*
- *Mechanical Engineering Technology Award*

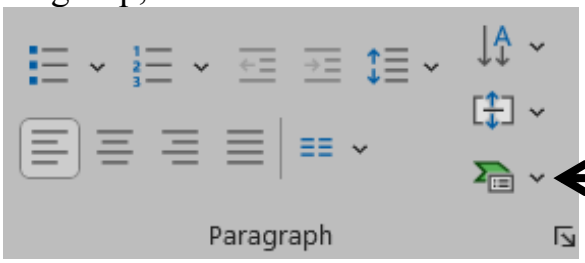

CT or ET awards

- *Joseph B. Aidala Memorial Award*
- *Martin Horowitz Memorial Award*

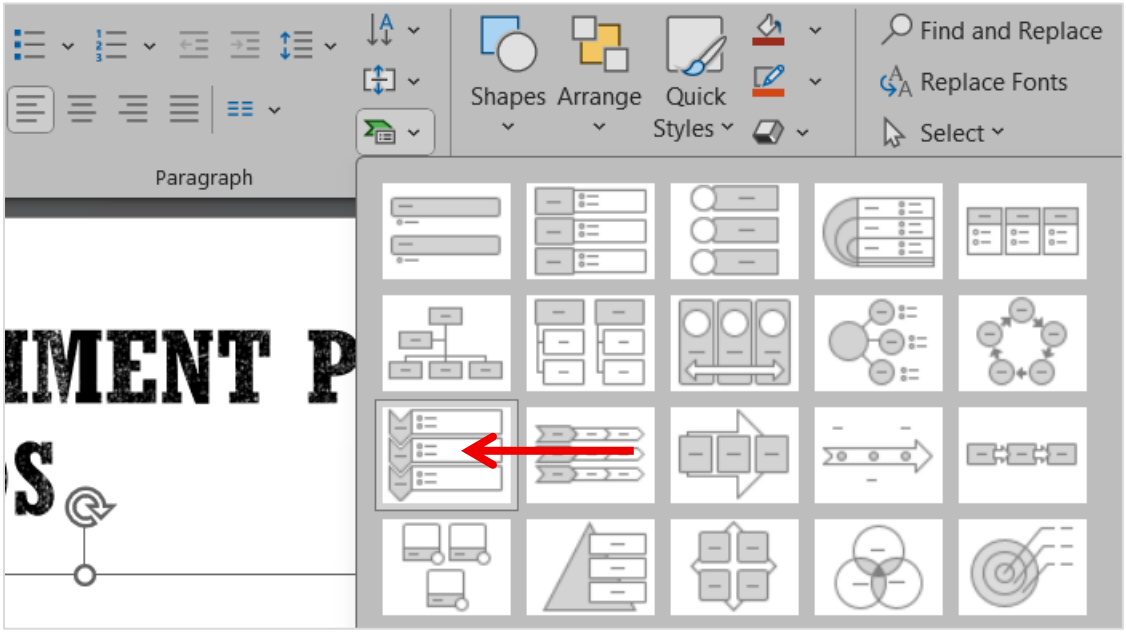

ET, CT, EM or TC awards

- *Professor Louis Nashelsky Award*
- *Pasquale Savarese Award*

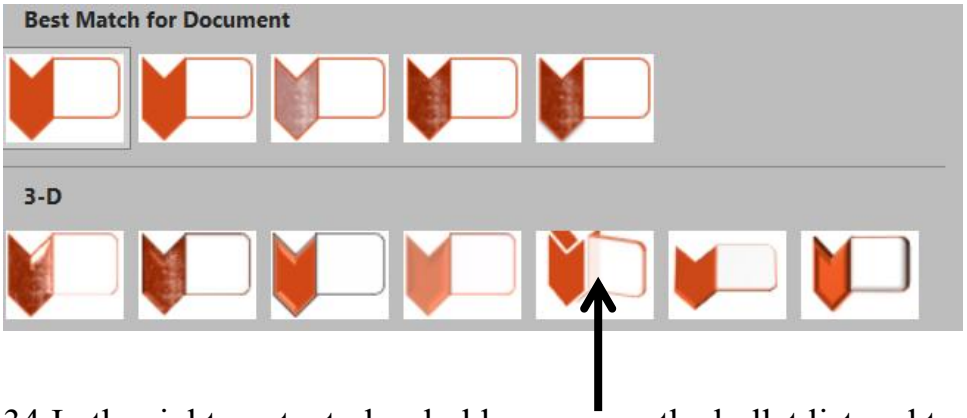

30. With the left content selected, in the **Home** tab, under the **Paragraph** group, click the **Convert to SmartArt Graphic** button.

31. From the **Convert to SmartArt** list, click on the **Vertical Chevron List**

32. Click on the **SmartArt Design** tab, click the more arrow from the **SmartArt Styles** group to show more styles.
33. From the list, click on the **Brick Scene** style, which is the style in the **3-D** group:

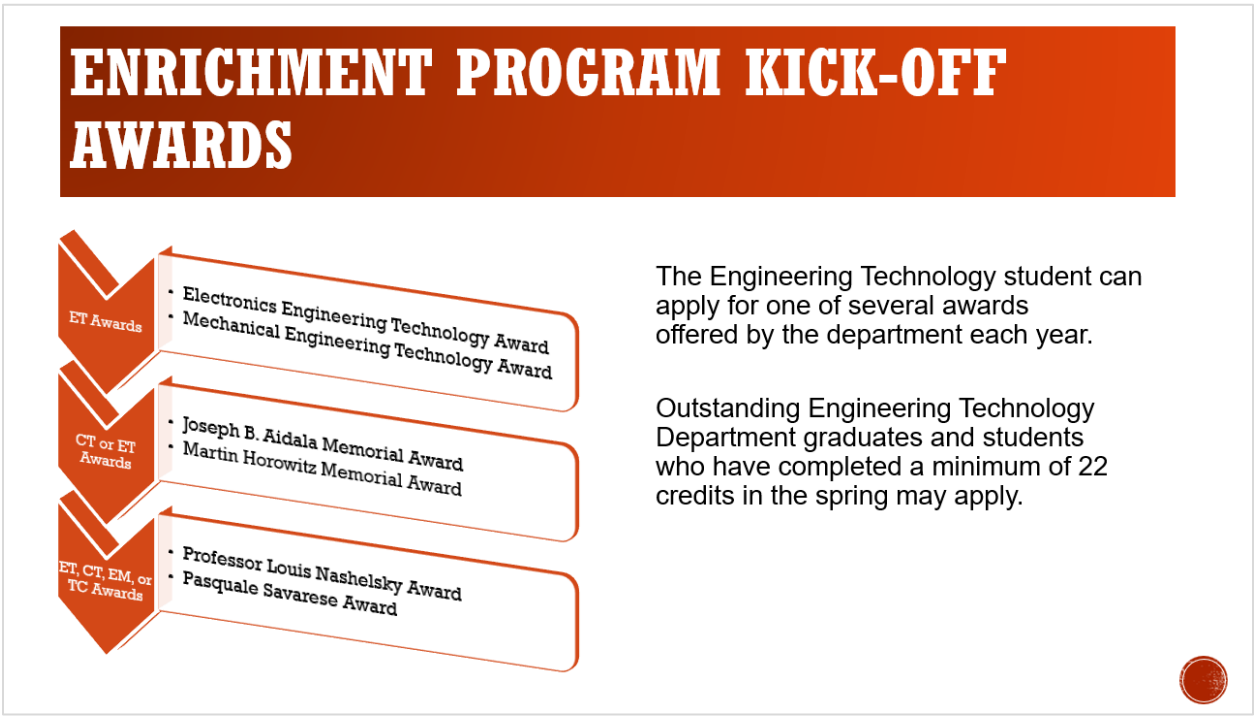

34. In the right content placeholder, remove the bullet list and type:

The Engineering Technology student can apply for one of several awards offered by the department each year.

Outstanding Engineering Technology Department graduates and students who have completed a minimum of 22 credits in the spring may apply.

35. Set the content alignment to 'Justify'.
36. Save your work.

The fourth slide should look like the following image:

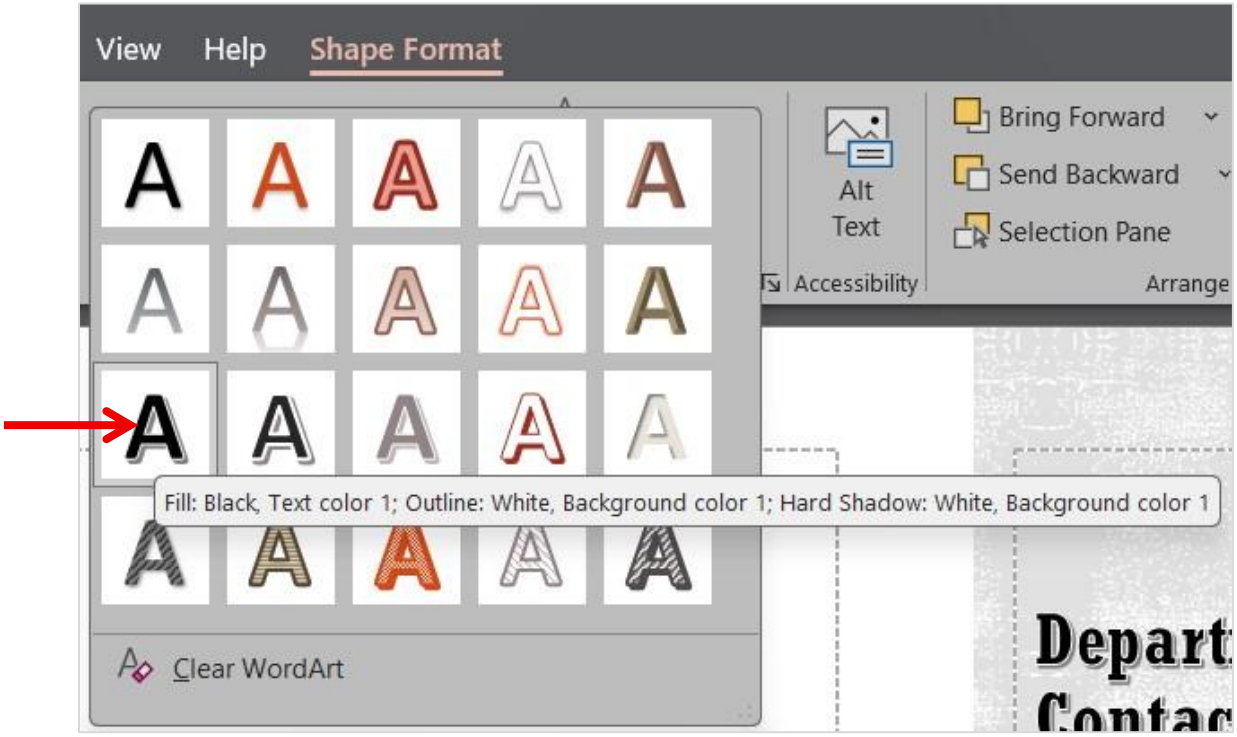

Format WordArt from a text

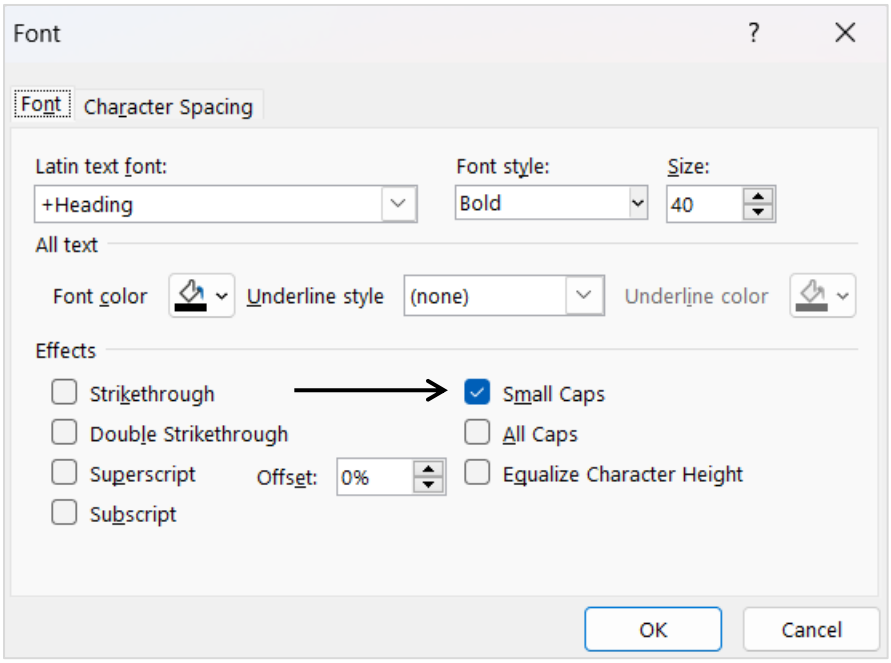

Formatting WordArt from a text allows users to transform plain text into visually appealing and creative designs. By selecting a piece of text and converting it into WordArt, users can enhance headings, titles, or key points in a document or presentation. Formatting WordArt is especially useful for drawing attention to important information and adding a professional or artistic touch to otherwise standard content.

37. On the **Home** tab, click the **New Slide** arrow, and then in the gallery, click **Content and Caption**.

38. Click on Title, which is located at the right column, and type *Department Contact Info.*
39. Select the title, click the **Shape Format** tab, click on **WordArt Styles** arrow to open the quick styles. From the list of styles, and click on the **Fill: black, Text color 1; Outline: white, Background color 1; Hard Shadow: white, Background color 1**

40. With the title still active, click on **Home** tab, then click on the **Font** arrow, and check **Small Caps** option. Also, change the font size to **40.**

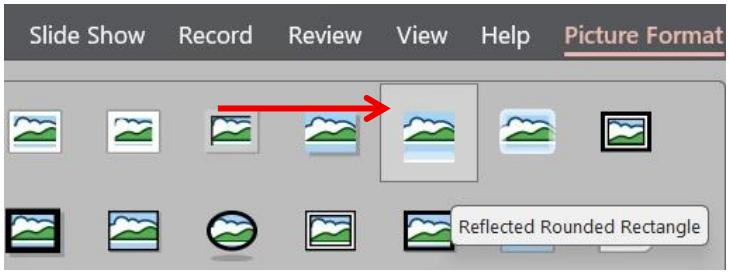

41. Click on the text content placeholder and type:
    Technology Building, T-20
    222-05, 56th Avenue, Bayside, NY

    (718)631.6207
    mgayle@qcc.cuny.edu

42. With the text content active, change the font size to **16.**
43. Select the two last lines and hit the **Tab** key once.

We can insert a **phone** and an **email** online picture to the text content.

44. Go to **Insert** tab, click on the **Pictures** icon, and click on the **Online Pictures** link. In the search online pictures box, type *phone icon* and press Enter.
45. Select a phone image from the list and click the **Insert** button.
46. With the phone image active, in the **Format** tab, change the **Height** and **Width** to 0.5”
47. Move the phone image next to the left of the phone number.
48. With the image still active, click the **Image Format** tab, under the **Picture styles,** click quick style arrow, to view more styles. From the styles list, click on the **Reflected Rounded Rectangle**

49. Repeat step 44 to 48 to insert an email image next to the left of the email address. The two images should be positioned as shown below:

In the left side of the slide, insert a communication image. To do so:

50. click the **Insert** tab, then click the **Pictures** icon.
51. From the list of **Insert Picture From,** click on **Stock Images.**
52. In the Search Stock Images box, type *communication and contact*, and press Enter.
53. Select one image from the list of images and press the **Insert** button.
54. Adjust the left image to fit the entire left space of the slide. You can also crop the image if it is needed.
55. Save your work.

The fifth slide should look like the following image:

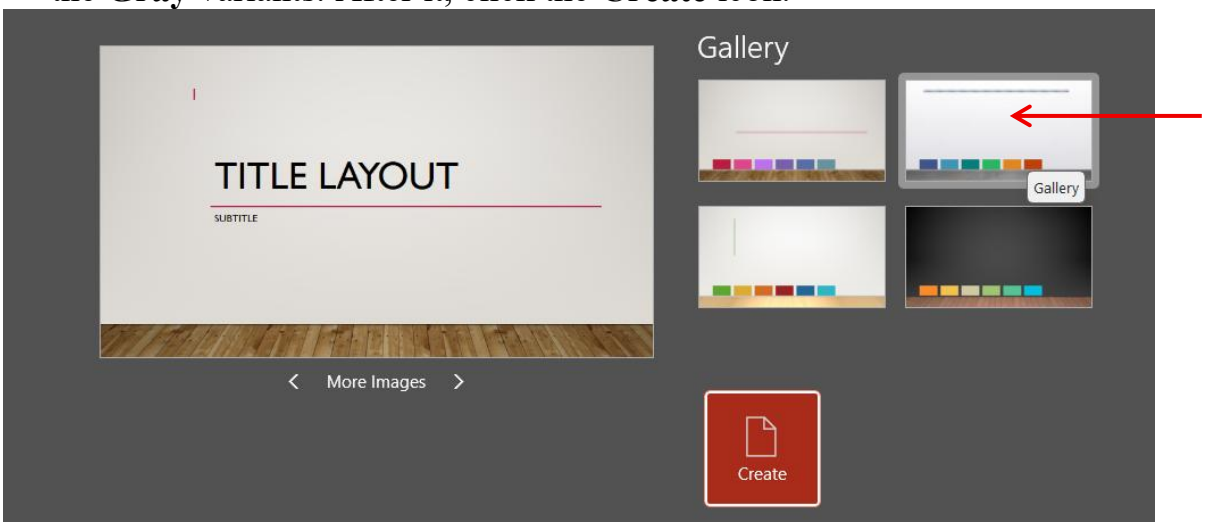

Skill 3: Present data using tables, charts, and animation

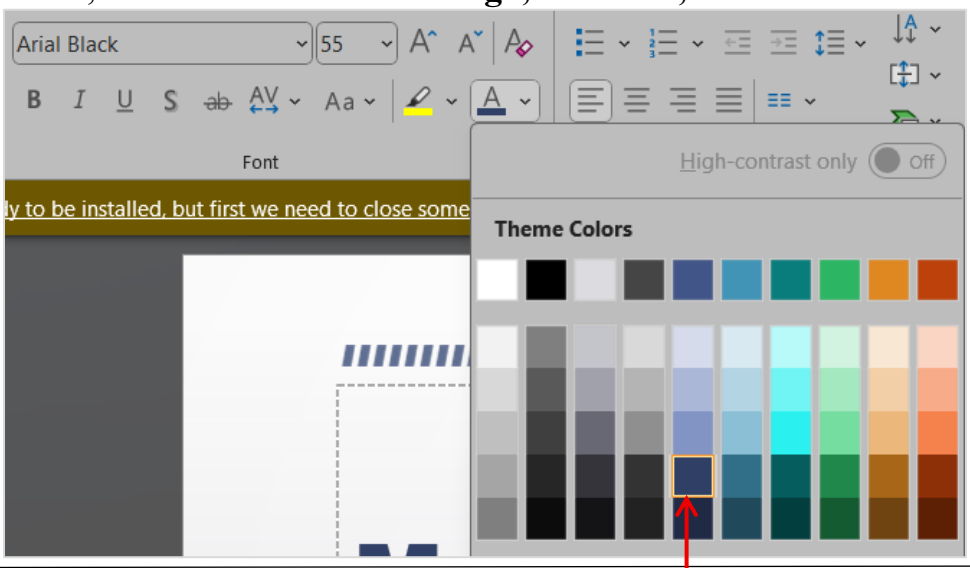

Insert and format a table

In a presentation, a table is used to organize and present information in columns and rows.

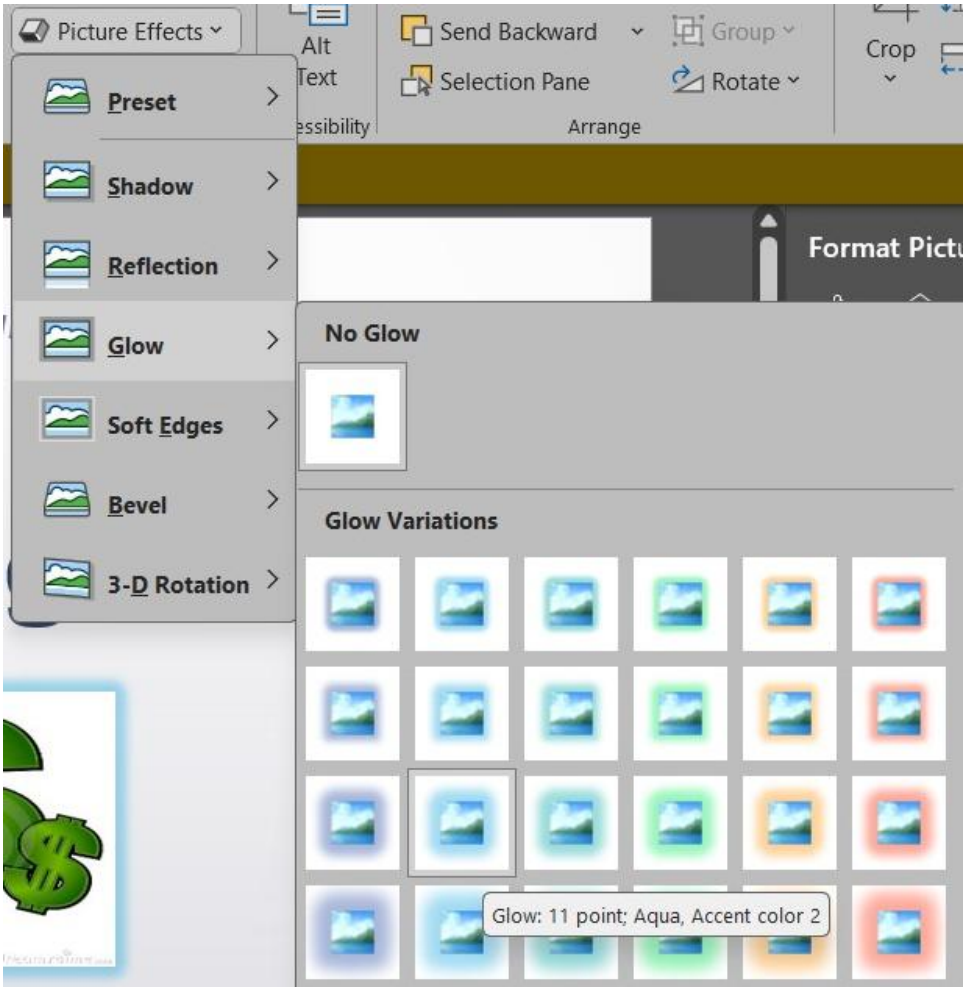

1. Start a new PowerPoint presentation with the **Gallery** template and select the **Gray** variants. After it, click the **Create** icon.

2. Save the file as *PowerPoint_activity3_StudentName.pptx*
3. Click on the Title and type *Manage Your Budget*.
4. Select the title to change the font family to **Arial Black**¸ the font size to **55**, and the font color to **Indigo, Accent 1, Darker 25%**

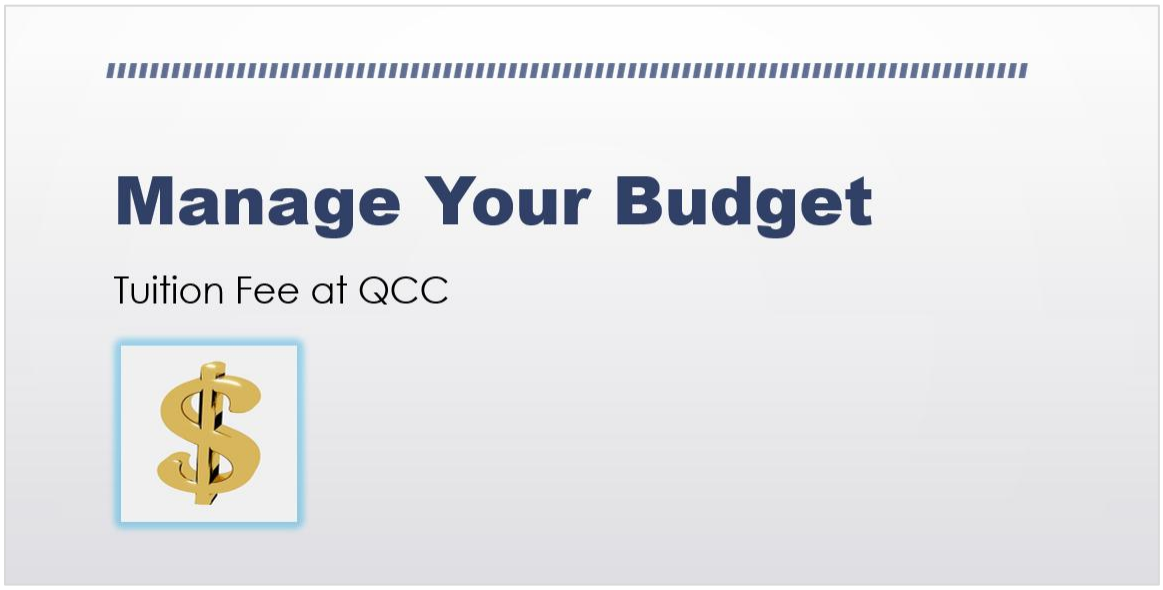

5. Click on the Subtitle and type *Tuition Fee at QCC*. Change the font size to **30.**
6. Insert an online picture of a dollar sign. To do so, click the **Insert** tab, click on the **Pictures** icon.
7. From the *Insert Pictures From,* click on the **Online Images,** and type *dollar sign* in the search box and press Enter.
8. Select a dollar sign image from the searched list and click on **Insert.**
9. Change the dollar sign image's **Height** and **Width** to **2"**
10. With the image still active, click the **Picture Format** tab, click on **Picture Effects,** hover to **Glow** icon, click on **Glow 11 point: Aqua, Accent color 2**
11. Click and hold, then drag the image to position it below the subtitle.

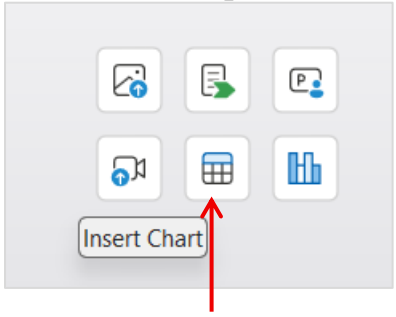

12. Save your work.

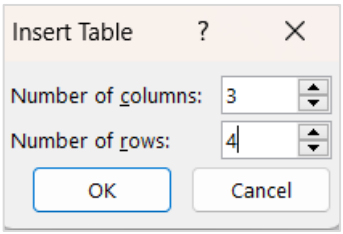

The first slide should look as:

13. On the Home tab, click the **New Slide** arrow. In the gallery, click **Title and Content** layout.
14. Click on the Title and type *Student Fees*. Select the title again and set the font style to **Bold** and **Text Shadow** formatting.
15. In the Content placeholders, click on the **Insert Chart** icon:

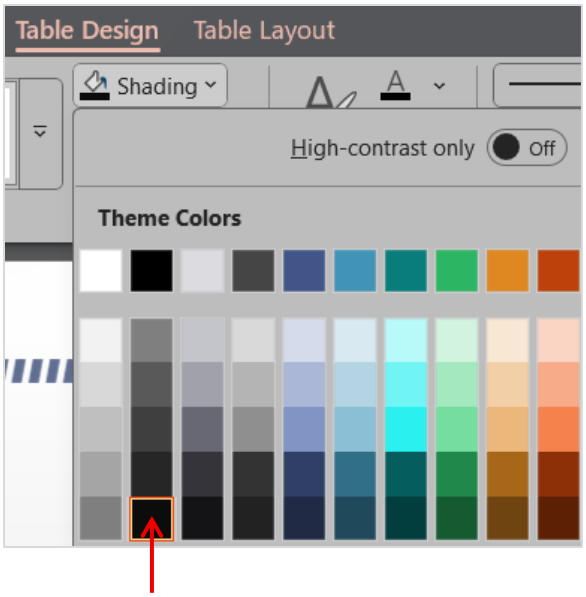

16. Create a 3 columns and 4 rows table.

17. Select the Table, click the **Table Design** tab, under the **Table Styles**, click the Table Styles arrow to show more table styles. From the style list, select and click on the **Themed Style 1 – Accent 6**

18. Select all the cells in the first row, click the **Table Layout** tab, and click the **Merge Cells** icon.
19. Type *Part time students (Less than 12 credits)* in the first row. Also set the first table row's font style to **Bold**, and align the text to **Center.**
20. In the second row, set the font style to **Bold,** and type the following in its respective column:
    - Left column: *Fees*
    - Center column: *Fall and Spring Semester*
    - Right column: *Summer Session Only*
21. In the third row, type the following in its respective column:
    - Left column: *Student activity fee*
    - Center column: *$27.03*
    - Right column: *$16.83 per session*
22. In the fourth row, type the following in its respective column:
    - Left column: *Technology fee*
    - Center column: *$62.50*
    - Right column: *$62.50*
23. Select all the columns in the second row, click the **Table Design** tab, click on the **Shading** icon to open the **Theme Colors** dialog box. In Theme Colors, click on **Black, Texture 1, Lighter 5%** color.
24. With the second row still selected, change the text to **Bold** and the align the text to the **Center.**

The table should look as:

Part time students (Less than 12 credits)		
Fees	**Fall and Spring Semester**	**Summer Session Only**
Student activity fee	$27.03	$16.83 per session
Technology fee	$62.50	$62.50

25. To create another table like the previous one, select the entire table, right-click to open the Format dialog box, and from the dialog box, click on **Copy.**

26. Right-click outside the table to open the Format dialog box, and from the dialog box, click on **Paste.**

27. Position the second table below the first table.

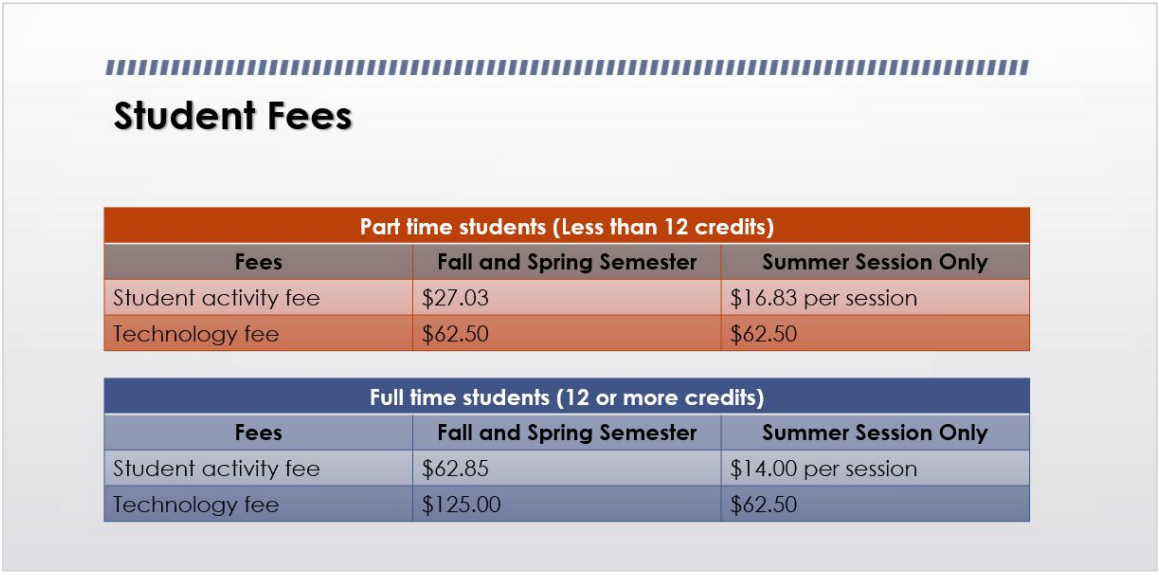

28. Select the second table, go to **Table Design** tab, click on the **Table Styles** arrow, select and click on the **Themed Style 1, Accent 1**

Change the information on the second table as:

29. Delete the text in the first row and type *Full time students (12 or more credits)*
30. Modify the following information in the third row of the second table:
    - Center column: *$62.85*
    - Right column: *$14.00 per session*
31. Modify the following information in the fourth table row:
    - Center column: *$125.00*
32. Save your work.

The second slide should look like the following image:

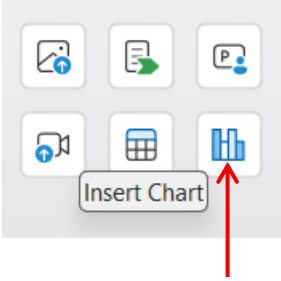

Student Fees

Part time students (Less than 12 credits)		
Fees	**Fall and Spring Semester**	**Summer Session Only**
Student activity fee	$27.03	$16.83 per session
Technology fee	$62.50	$62.50

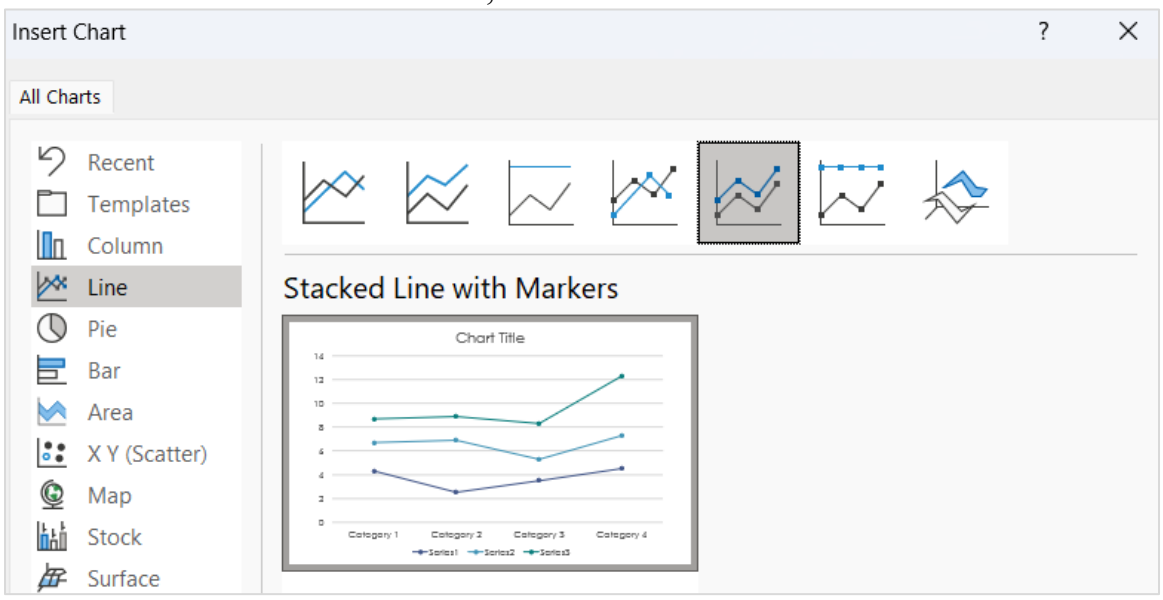

Full time students (12 or more credits)		
Fees	**Fall and Spring Semester**	**Summer Session Only**
Student activity fee	$62.85	$14.00 per session
Technology fee	$125.00	$62.50

Insert and Modify Charts

33. On the **Home** tab, click the **New Slide** arrow, and then in the gallery, click **Title and Content** layout.
34. Click on the Title and type *Tuition Rates for Full-Time Students*. Select the title again and set the font style to **Bold** and **Text Shadow.**
35. In the Content placeholders, click on the **Insert Chart** icon.

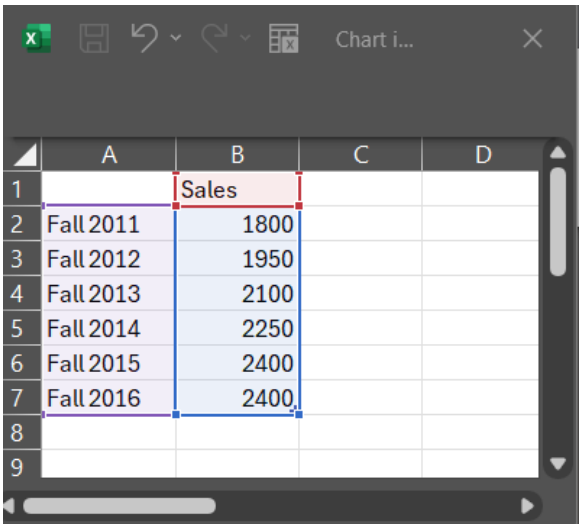

36. In the **Insert Chart** window, from the **All Charts** list on the left, click on **Line** icon. From the different Line Style on the Top of the window, click on **Stacked Line with Markers**, and click **OK.**

When you insert a chart, PowerPoint opens a chart for the user to input the chart information and data.

37. In the Chart, input the following data:

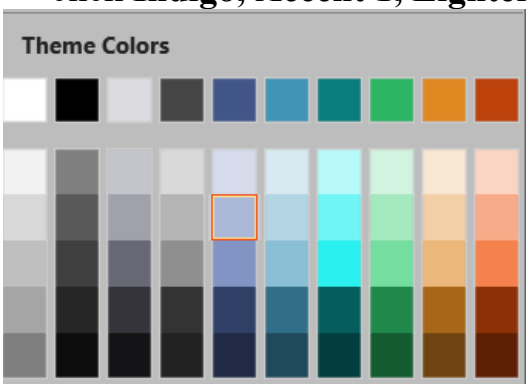

Once you complete the Chart, you can close the data chart.

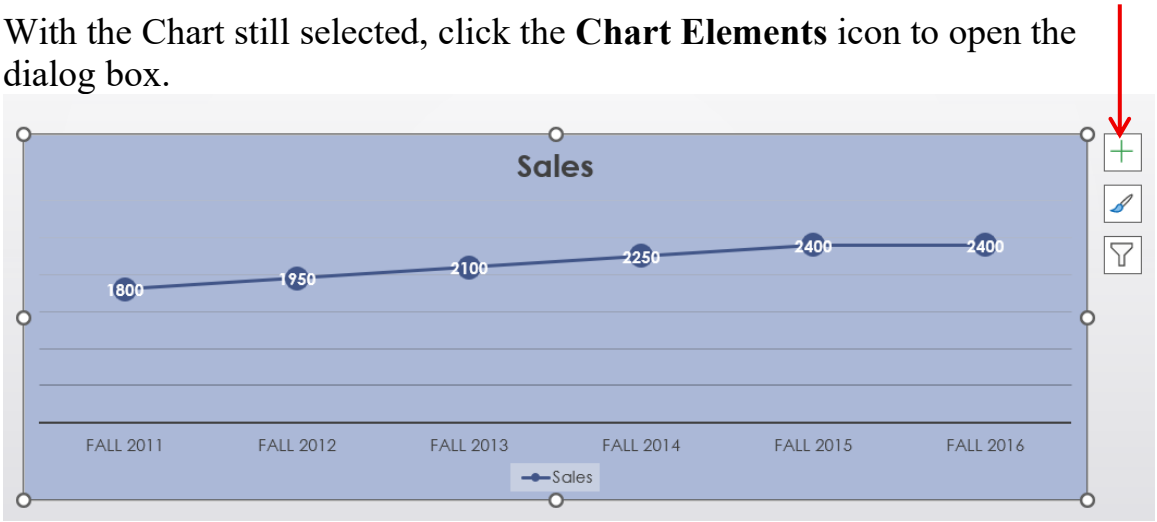

38. With the chart selected, go to **Chart Design** tab, in the **Chart Styles** group, click on **Style 2**

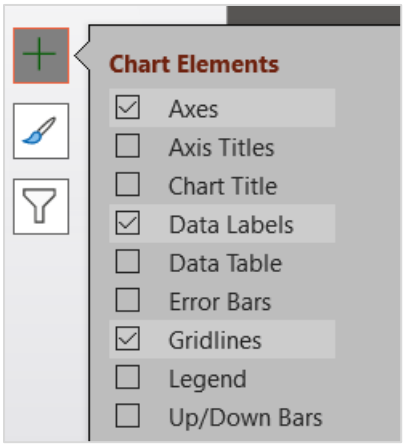

39. With the chart selected, click the **Format** tab, click the **Shape Fill**, and click **Indigo, Accent 1, Lighter 60%**

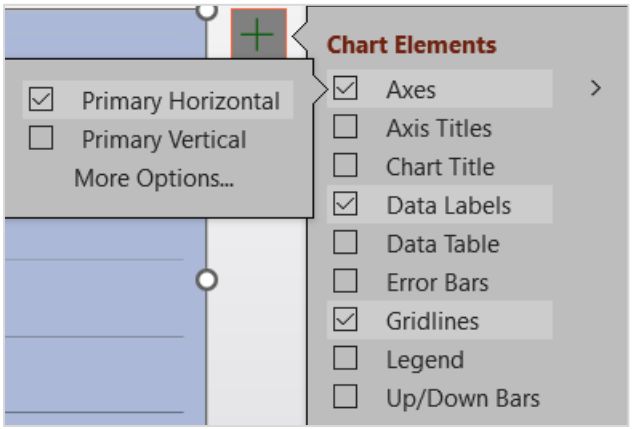

40. With the Chart still selected, click the **Chart Elements** icon to open the dialog box.

41. In the dialog box, only check the **Axes, Data Labels,** and **Gridlines** boxes:

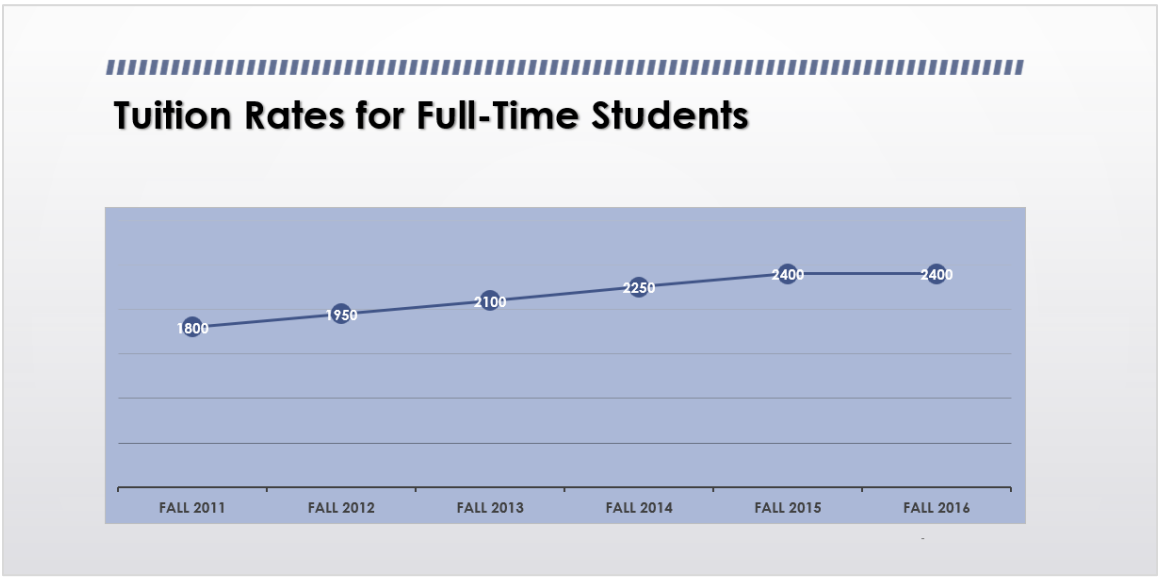

42. Click on the **Axes** arrow and uncheck the **Primary Vertical** box:

43. Select the x-axis data and **bold** the text.
44. Save your work.

The third slide should look like the following image:

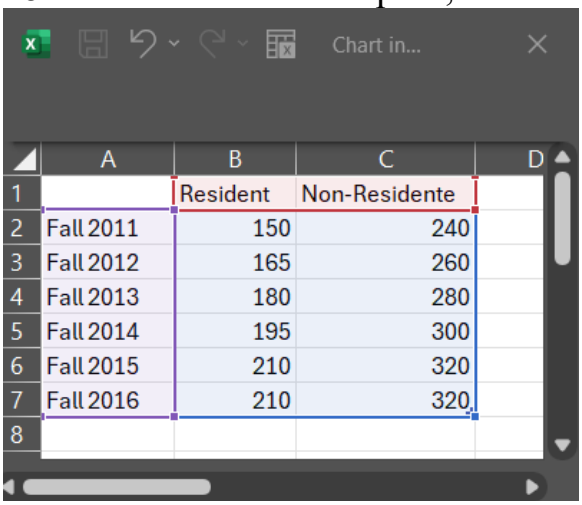

Duplicate and modify charts

45. On the **Home** tab, click the ***New Slide*** arrow, and then select ***Blank Slide*** from the gallery.
46. Go to **Insert** tab, from the **Illustrations** group, click on the **Chart** icon.
47. In the **Insert Chart** window, from the **All Charts** list on the left, click on the **Column** icon. From the different Line Style on the Top of the dialog window, click on **3-D Clustered Column**, and click **OK.**

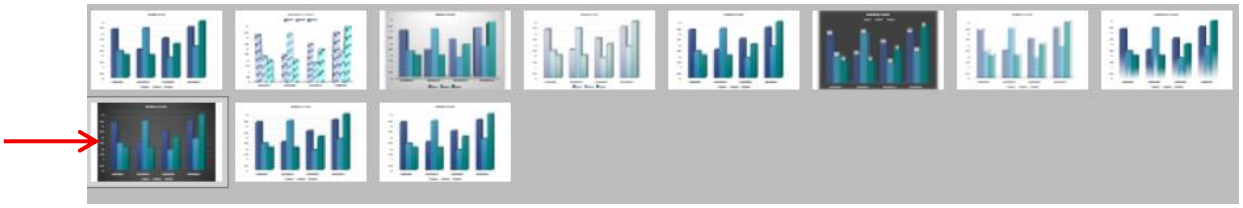

48. When the data table opens, in the data chart, input the following data:

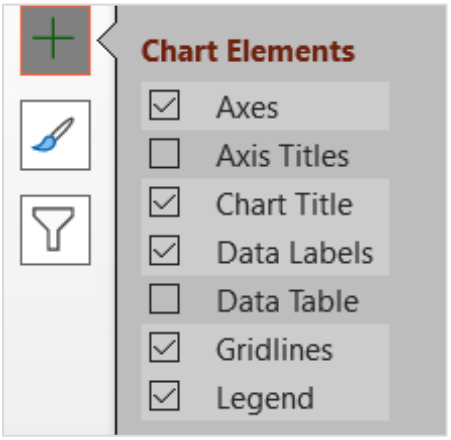

Once you complete the Chart, you can close it.

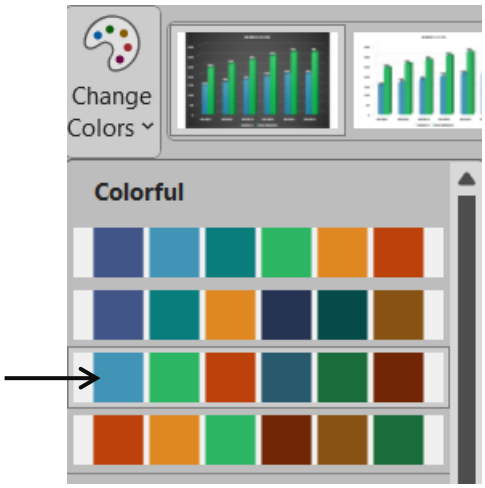

49. With chart selected, click on the **Chart Design** tab, in the **Chart Styles** group, click on **Style 9.**

50. With the Chart selected, click the **Chart Elements** icon to open the dialog box.
51. In the dialog box, only check **Axes, Chart Title, Data Labels, Gridlines,** and **Legend** boxes.

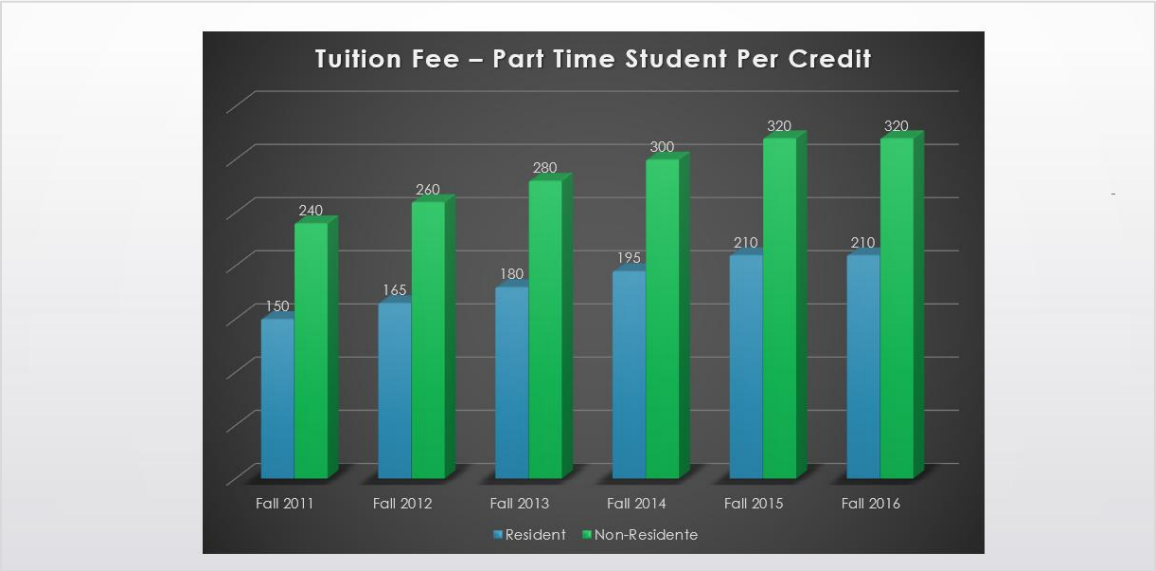

52. Click on the **Axes** arrow and uncheck the **Primary Vertical** box.
53. Click the **Chart Design** tab, click on the **Change Colors** icon, from the color list, select **Colorful palette 3**

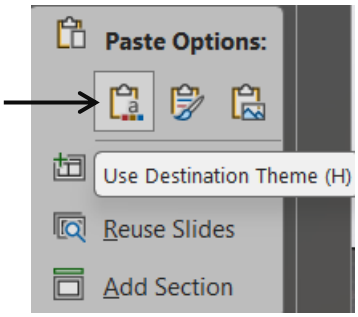

54. Click on the Chart title and type *Tuition Fee – Part Time Student Per Credit.* Select the title again and set the font style to **Bold** and **Text Shadow.**
55. If the chart is not centered on the slide, you can click-hold and drag the chart to the center of the slide.
56. Save your work.

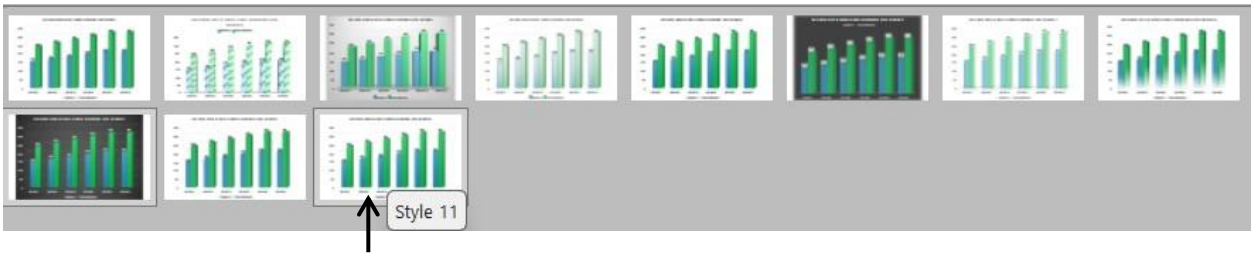

The fourth slide should look like the following image:

57. In the left pane of PowerPoint, you'll see all the slides we've created. Right-click the fourth slide and select the **Copy** icon.
58. Then, right-click the blank space after the fourth slide, and under *Paste Options*, click the **Use Destination Theme**, which is the first icon from the left.

59. In the fifth slide, click the chart, click to the **Chart Design** tab, and click on **Chart Styles** arrow to open the Chart Styles window. From the list of styles, select **Style 11**

60. With the chart still selected, click the **Chart Design** tab, click on **Change Colors** arrow, and select **Colorful palette 4** from the list.

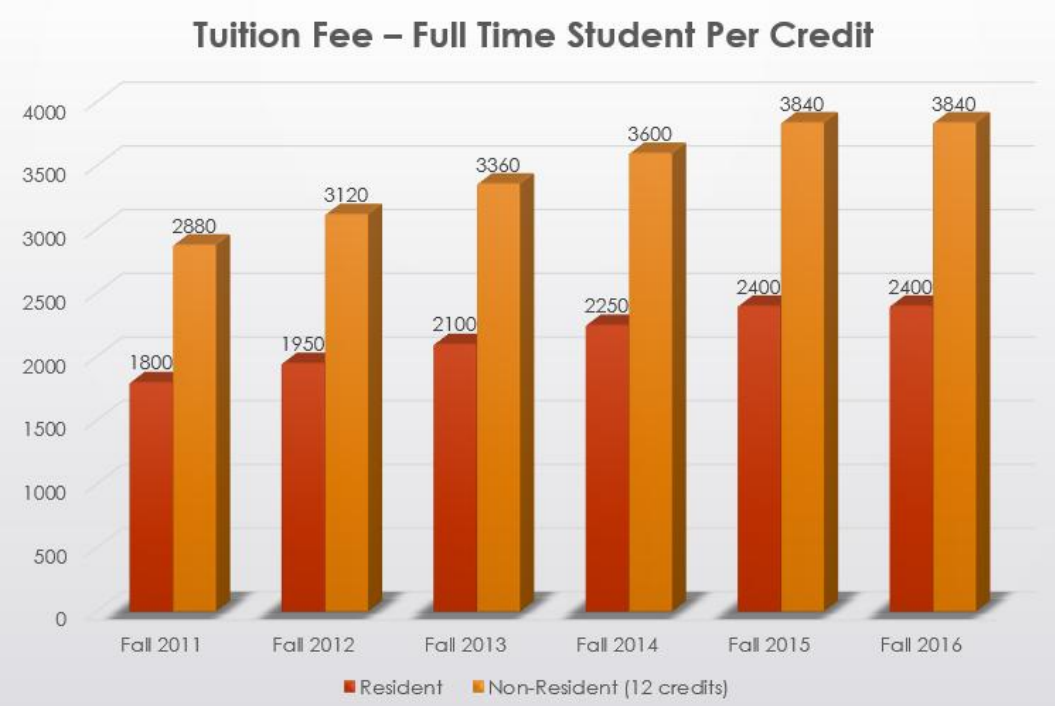

61. Change the information in the chart with the following information

Fall semester	Resident full-time	Non-resident cost at 12 credits
2011	$1800	$2880
2012	$1950	$3120
2013	$2100	$3360
2014	$2250	$3600
2015	$2400	$3840
2016	$2400	$3840

Also, change the chart title to *Tuition Fee – Fall-time Student*

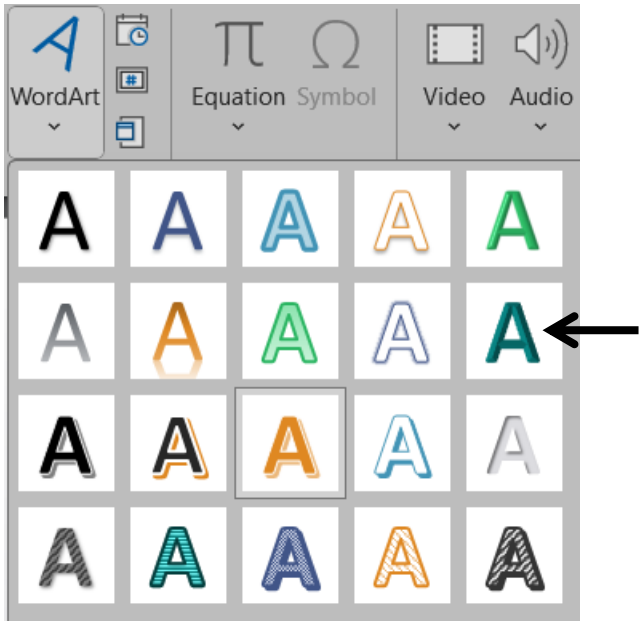

62. Save your work

The fifth slide should look like the following image:

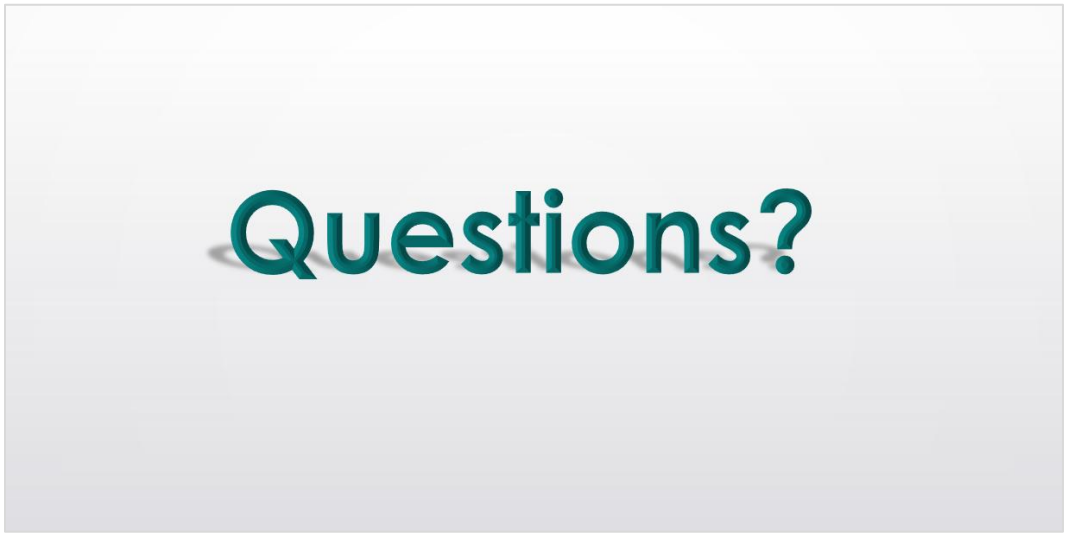

Working with WordArt

63. Insert a new **Blank** slide as the sixth slide.
64. In the sixth slide, click on the **Insert** tab, click on the **WordArt** icon, and select the **Fill: Dark Teal, accent color 3; Sharp Bevel** style.

65. Click in the WordArt and type *Questions?*
66. Select all the text in the WordArt, click on the **Shape Format** tab, click on the **Text Effects** icon and hover the **Shadow** effect. From the Shadow group, click on **Perspective: Upper left** shadow.
67. With the WordArt text still selected, click on the **Home** tab, and change the font size to **100.**
68. Use the click-hold and drag technique to center the WordArt.
69. Save your work.

The sixth slide should look like the following image:

Skill 4: Create dynamic slides using animation effects and transitions

There are three types of animation: entrance effect, emphasis effect, and exit effect.

An ***entrance effect*** is an animation that appears as an object or text is moved onto the screen. An ***emphasis effect*** is an animation that emphasizes an object or text that is already displayed. An ***exit effect*** is an animation that appears as an object or text is moved off the screen. You can apply ***Motion Path*** animation effects to move slide objects in a sequence that tells an effective story.

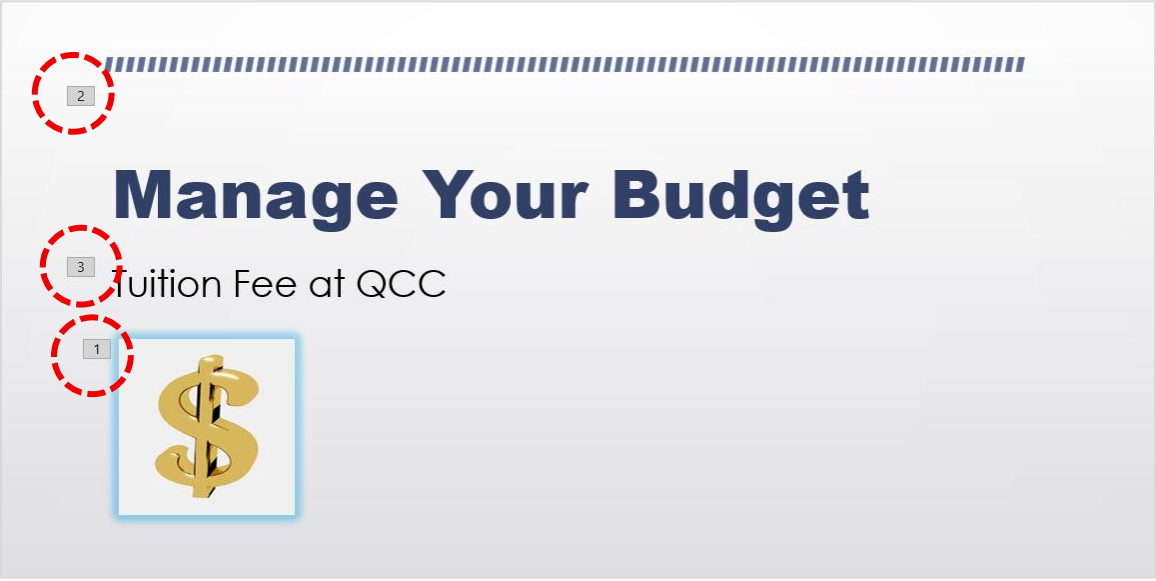

Entrance effect

1. In the left pane of PowerPoint, you'll see all the slides we've created. Click on the first slide.
2. From the first slide, click on the dollar sign image. With the image selected, click the **Animations** tab, and click on the **Animation** arrow to open the animation panel.
3. From the **Entrance** list, select the **Bounce** animation.
4. To review the animation, click the *Preview* icon and check that the dollar sign image is bouncing. The *Preview* icon is located at the top-left corner of PowerPoint.

When an animation is added to an element, an animation marker will appear in the left pane next to the slide thumbnail. The animated element will also display a number, which indicates the animation order.

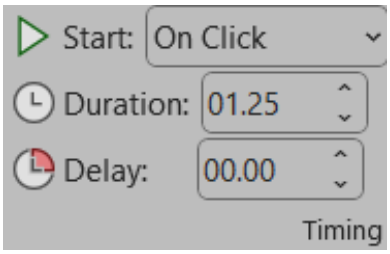

5. Click on the slide title, click the **Animations** tab, and click on **Float In** animation from the **Animation** panel. Click on the **Preview** icon to review the animations.
6. Click on the slide subtitle, click **Animations** tab, and click on **Split** animation from the **Animation** panel. Click on the **Preview** icon to review the animations.

   The animation order is displayed next to the elements as shown in the image below:

You can change the duration of an animation effect by making it longer or shorter:

7. Click on the first animation, which is the dollar sign image, click the **Animations** tab, under the **Timing** group, change the **Duration** to **01.25** seconds:

8. Click on the second animation, which is the slide title, change the **Duration** to **01.50** seconds.
9. With the second animation still selected, click on the **Effect Option** icon and change the **Direction** to **Float Down.**

The order in which each animation is played can be changed by moving the animation to an earlier or later point in the sequence.

10. Click on the first animation, go to the **Timing** group, from the **Reorder Animation** list, click the **Move Later** arrow twice to change the animation order from the first order to the third order. To confirm the order of animation, you can check the order number on the slide:

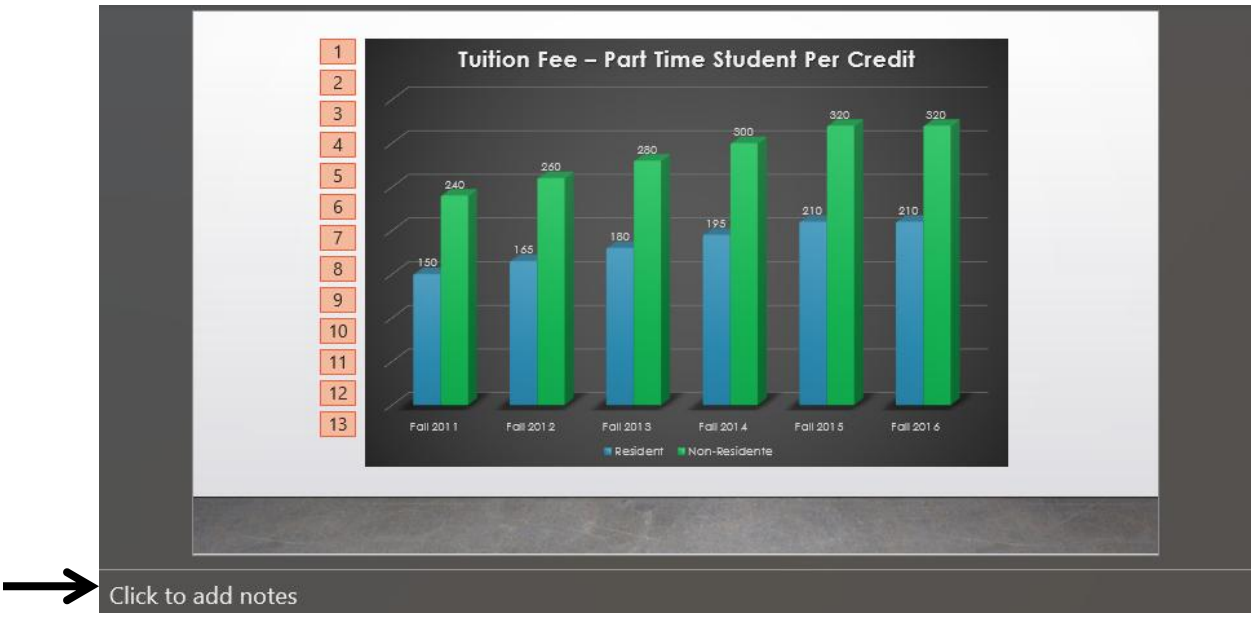

This procedure reorders the animations so that the title appears first, the subtitle second, and the image third. Click the Preview icon to review the animations.

11. Save your work.

The same animation can also be applied by element of a group:

12. Go to the fourth slide and select the chart.
13. With the chart selected, click the **Animations** tab, select the **Wipe** effect from the **Entrance** group.
14. With the Wipe effect already applied to the chart, click on the **Effect Options** icon, and select **By Element in Series** from the **Sequence** group. Also, change the Wipe effect **Duration** to **00.75** seconds. Click on the **Preview** icon to review the animations.

You can also add a note to a slide in the box below the slide. The box has a placeholder that says *Click to add notes*.

Adding notes to a PowerPoint slide help you remember key talking points that don't appear on the slide, stay organized and ensure you cover all intended topics in the correct order.

If multiple people are presenting, notes ensure consistency in messaging and help others understand how each slide is meant to be explained. When you share the presentation later (e.g., as a PDF with notes), viewers can read your full explanations even if they didn't attend the live session.

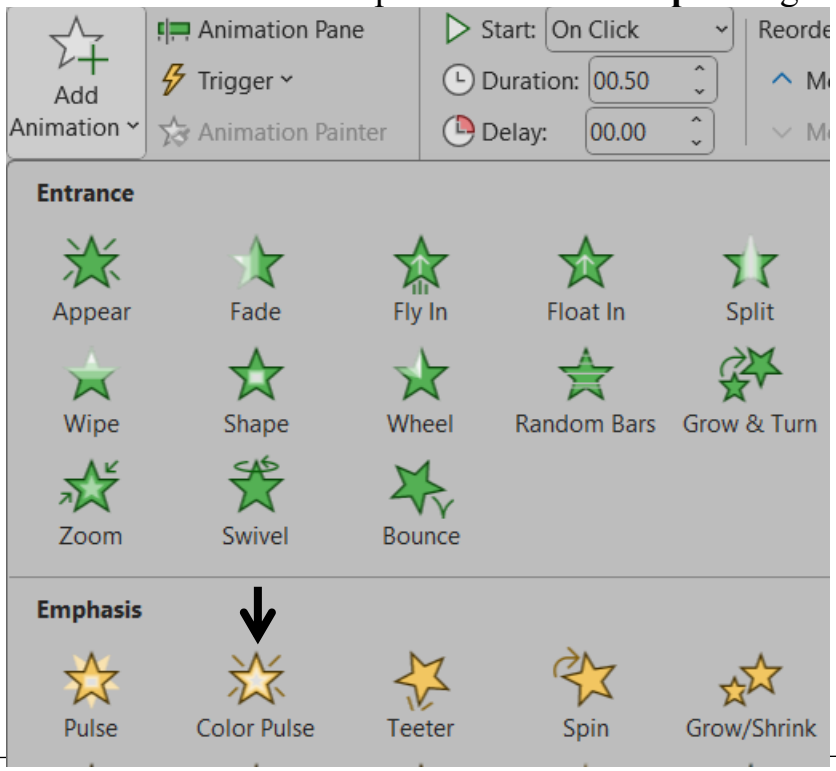

15. In the fourth slide, describe the behavior of the chart by adding your observation as a note. Review the animation first, then type your observation in the slide's notes section.

Emphasis effect

16. Go to the third slide and click on the chart.
17. With the chart selected from the **Animation** list, select the **Pulse** effect from the **Emphasis** group.

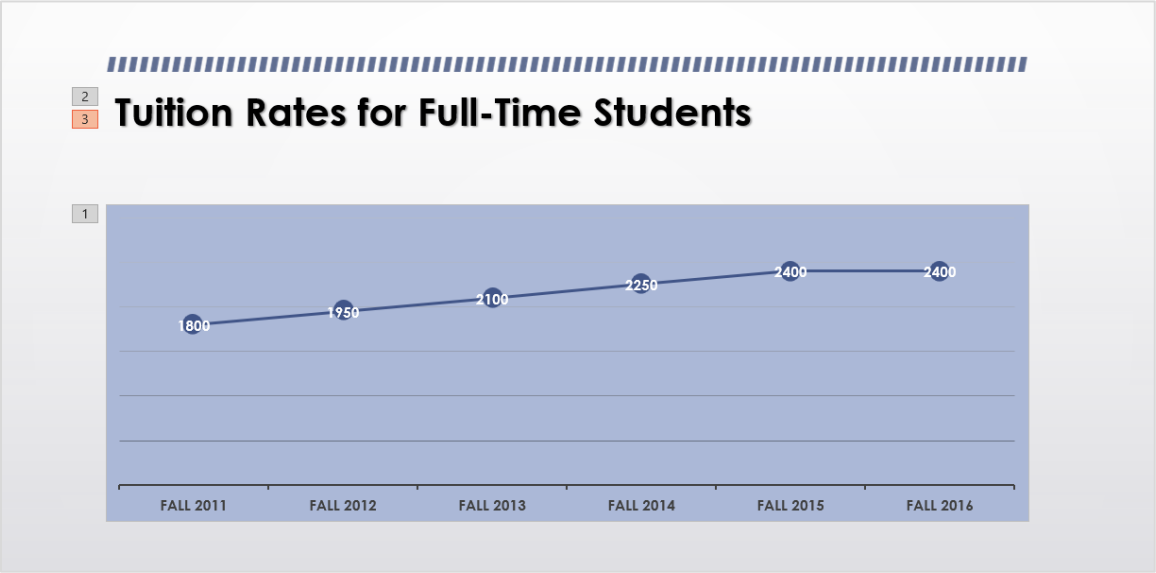

Different animations can be applied to one element by using the **Add Animation** event.

18. Click on the slide title, from the **Animation** list, select **Fade**. Also, change the animation **Duration** to **01:00** seconds.
19. To add another animation to the title, click on the **Add Animation** icon, and click on **Color Pulse** emphasis from the **Emphasis** group.

20. To format the effect to the Color Pulse emphasis, click on **Effect Options,** and from the **Theme Color** group, click on the **Brown accent 6** color.

If we preview the animation, we can see both animations applied to the title.

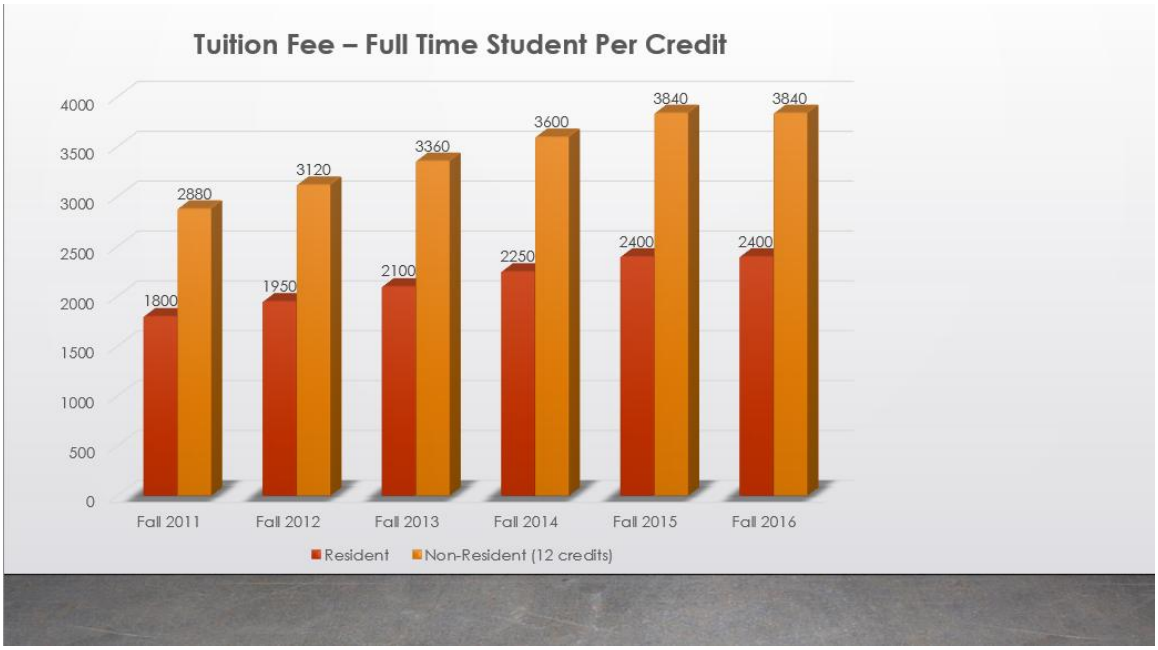

21. Save your work.

Exit effect

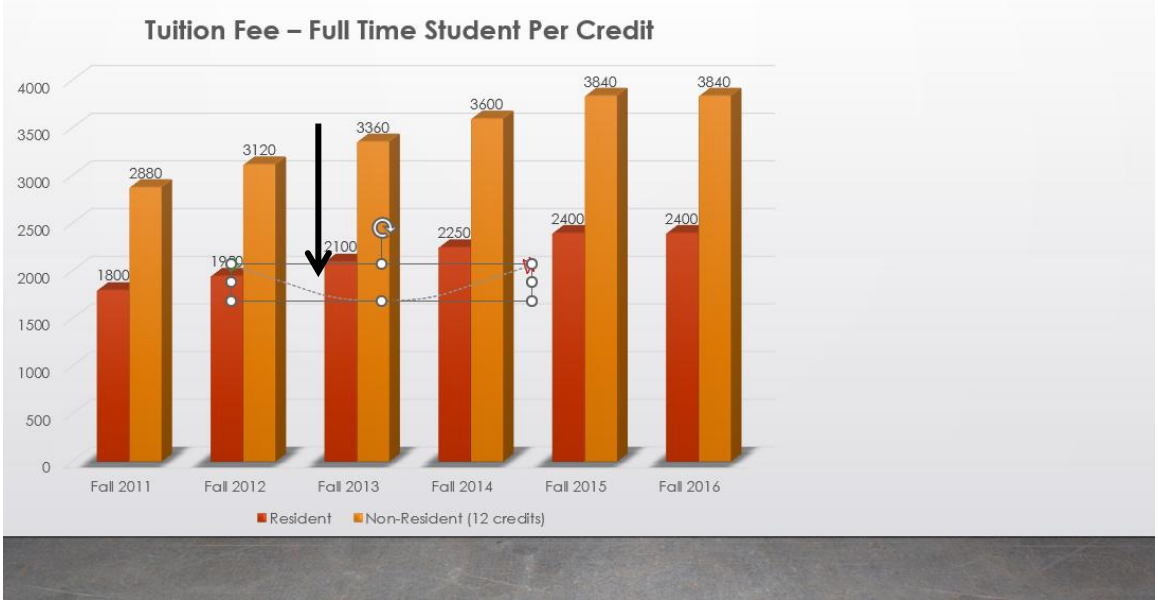

22. Go to the second slide and select the first table.
23. Select the first table, and from the **Animation** list, select the **Float Out** effect from the **Exit** group.
24. Select the second, and from the **Animation** list, select the **Shape** effect from the **Exit** group.
25. To change the Shape effect, click on **Effect Options**, select the **Square** shape and the **In** direction. Also, change the animation **Duration** to **01:00** seconds.

Motion Paths

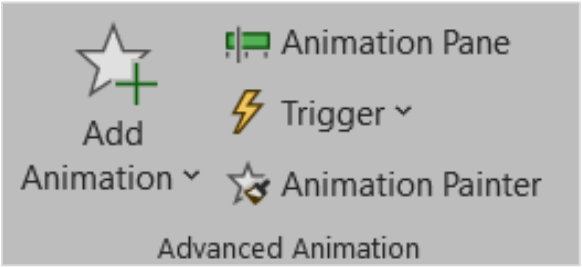

26. Select the fifth slide, click-hold on the chart, and drag (move) the chart to the bottom-left corner of the slide.

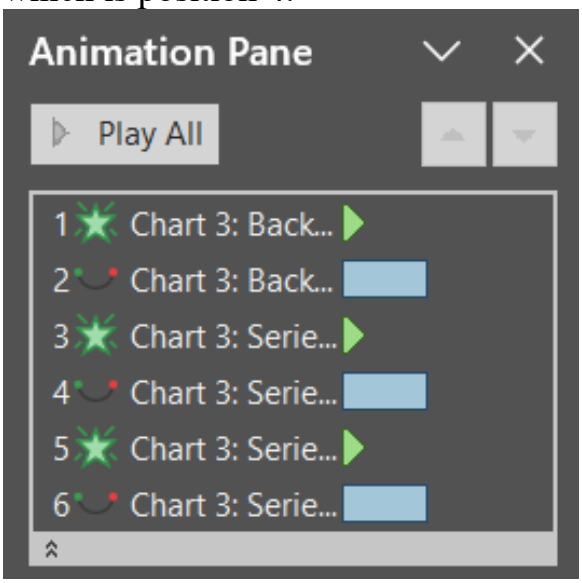

27. With the chart selected, go to **Animations** tab, and click on the **Appear** effect from the **Entrance** group.
28. Click on **Effect Options**, select the **By Series** from the **Sequence** list.
29. With the chart still selected, click on **Add Animation**, and scroll down to **Motion Paths** group. In Motion Paths group, select the **Arcs** effect.
30. Adjust the **Arcs** effect to half of its width

31. Now, click on **Animation Pane** icon, from the **Advanced Animation** group, to open the Animation Pane.

32. In the Animation Pane, use the Up Arrow to move the first Arcs effect, to position 2.
33. Now, take the second Arcs effect, and move it to the next even position, which is position 4.

34. Click the Preview button to check the animation of the elements. Add a note to the fifth slide describing the animation on the chart.
35. Save your work

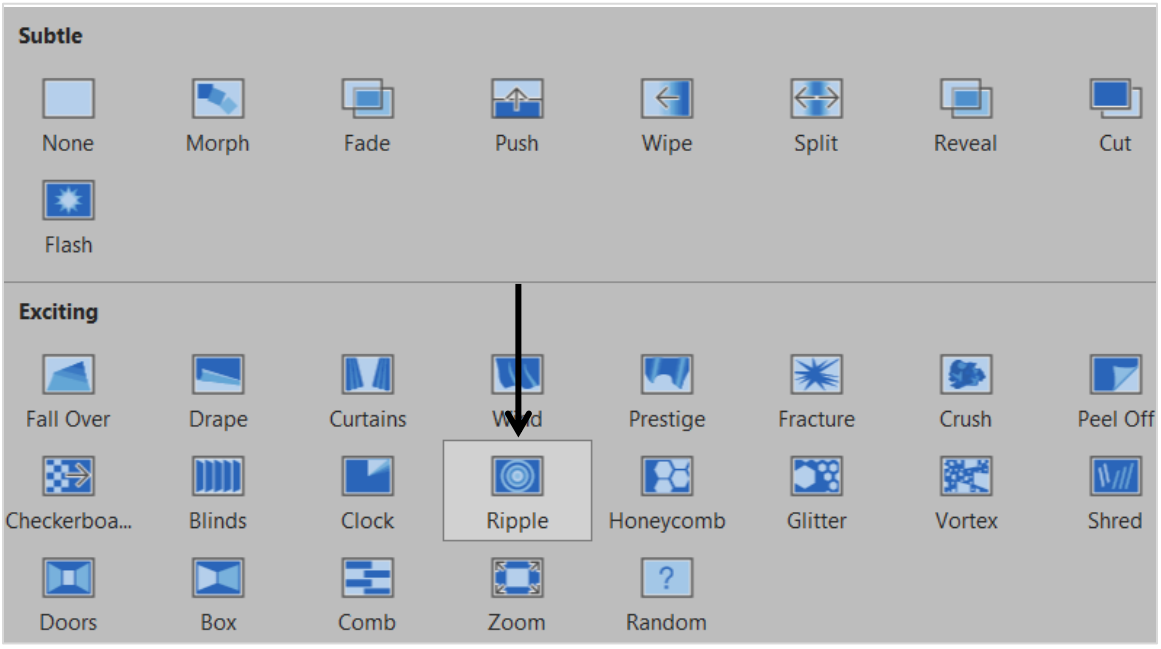

36. Go to sixth slide and select WordArt.
37. Click the **Animation** tab and click on the **Grow & Turn** entrance animation.
38. With the animation still selected, click on **Add Animation** icon and click on **Brush Color**. Change the animation **Duration** to **01.00** seconds
39. With the animation still selected, click the *Effect Options* icon, then change the effect color to **red**.
40. Click on the **Preview** icon to review the animations.

Transitions between slides

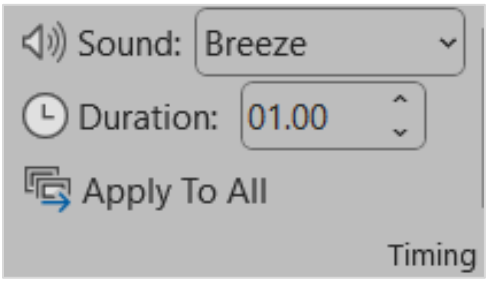

When a presentation is viewed as a slide show, the entire slide fills the screen. When connected to a projection system, and audience can view your presentation on a large screen.

Slide transitions are motion effects that occur in a slideshow as you move from one slide to another.

41. Go to the first slide and click the **Transitions** tab. In the **Transition to This Slide** group, click the **Transition effects** arrow to display the **Transitions** gallery. In the gallery, under **Exciting** group, click on **Ripple** transition.

42. Change the **Duration** of the transition to **01.00** seconds. Also, click on the **Sound** arrow, and select **Breeze** sound from the list.

43. Click on the **Effect Options** icon and select **From Top-Left.**
44. Click the **Apply To All**, to apply the transition to all slides.
45. Click the **Preview** icon to view the transition in slides.
46. Save your work

To review the slide show from the beginning, press the function key **F5** from the keyboard. You can also review the slide show from the beginning by going to the **Slide Show** tab and click on the **From Beginning** icon.

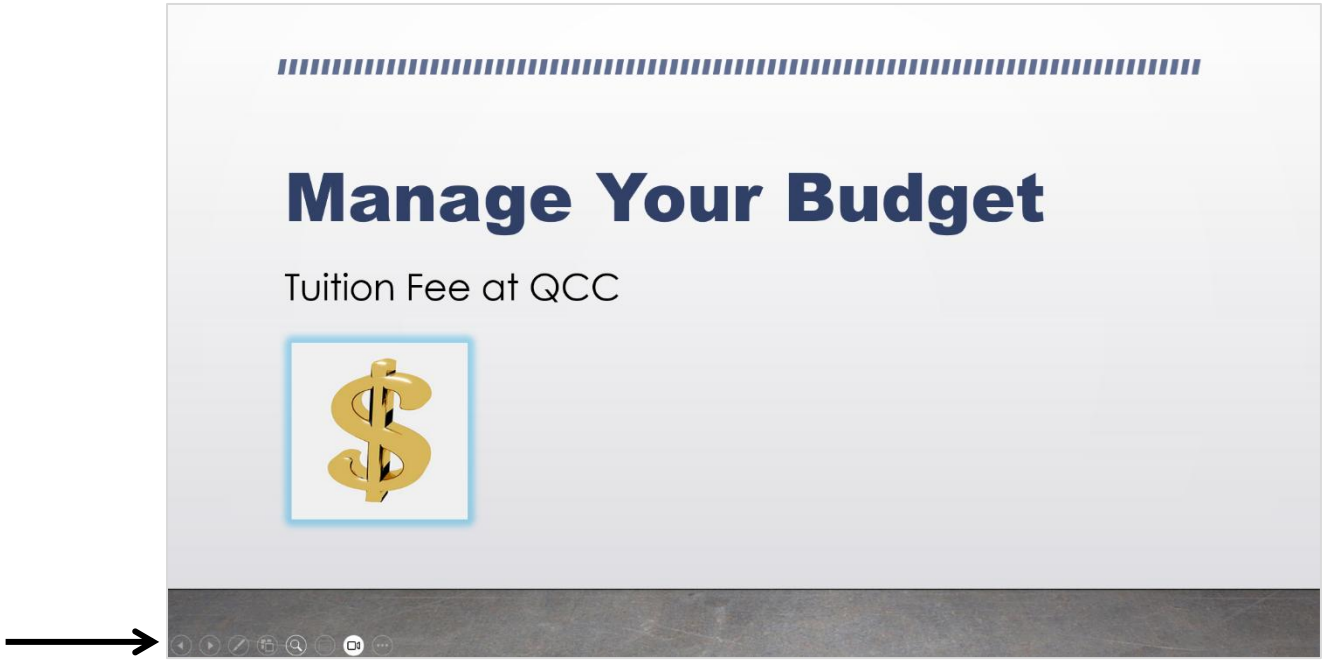

Also, if you want to play the slide show from a specific slide, just click on the slide, and then click on **From Current Slide** icon.

During a slide show, you can see the **navigation toolbar** on the bottom of the slide. In PowerPoint **Slide Show mode**, the **Navigation Toolbar** is a small, semi-transparent control bar that appears (usually in the bottom-left corner) when you're presenting slides. It helps presenters navigate and interact with their presentation more easily.

The Navigation Toolbar typically includes:

1. **Previous Slide** – A back arrow to go to the previous slide.
2. **Next Slide** – A forward arrow to advance to the next slide.
3. **Pen and Laser Pointer Tools** – Lets you use a pen, highlighter, or laser pointer on your slides.
4. **See All Slides** – Opens a slide sorter view so you can jump directly to any slide.
5. **Zoom into Slide** – Zooms into part of a slide for emphasis.

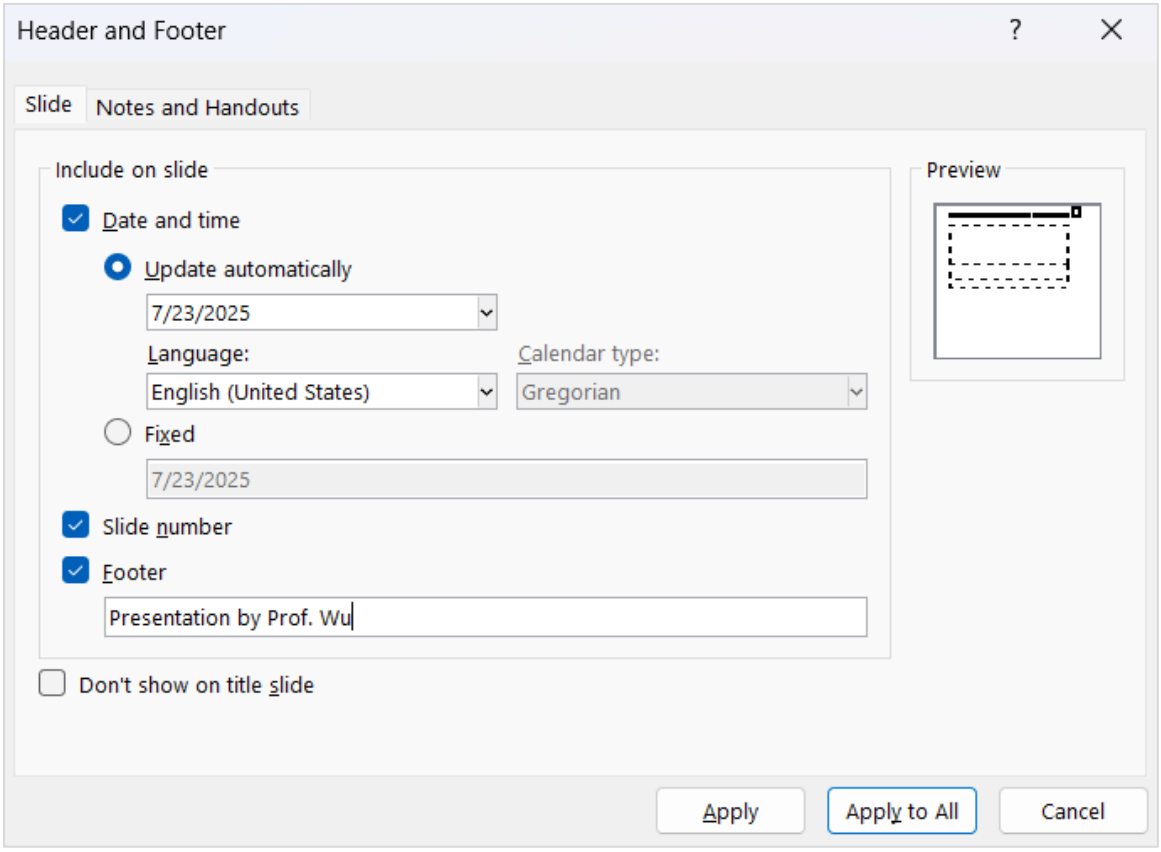

6. **More Options (Three Dots …)** – This menu can include options like:
    - Show/Hide Presenter View
    - Screen black or white
    - End the slide show
    - Change pointer options
    - Turn subtitles on/off

Insert Headers and Footers

A header is text that prints at the top of each page of slide handouts. A ***footer*** is text that displays at the bottom of every slide or that prints at the bottom of a sheet of slide handouts or notes pages.

47. Go to **Insert** tab, click the **Header & Footer** in the **Text** group to open the Header and Footer dialog box.
48. In the Header and Footer dialog box, check the **Date and time** box and verify it is set to **Update automatically**, check the **Slide Number** to insert the slide number, check the **Footer** box and type in the footer content: *Presentation by Prof. Wu*

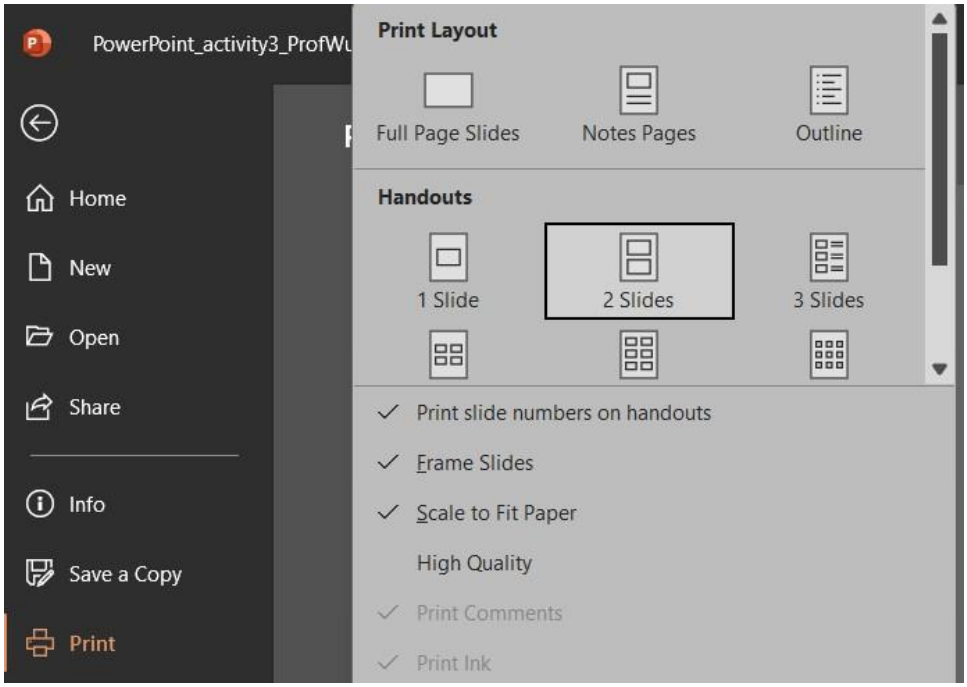

49. Once the Header and Footer are complete, click on **Apply to All** slides.

Print Handouts

Slide handouts are printed images of slides of a sheet of paper.

50. On the **File** tab, click **Print** icon
51. On the **Print** page, under **Settings,** click on the **Full-Page Slides**, and select **2 Slides** under **Handouts** group:

52. Once the print setting is set, click on the **Print** icon.

---------- Lab Experiment Ends Here ----------

Reflection Instructions:

Each **skill set (1–4)** must be demonstrated on your slides to receive full credit. Each skill set is worth **5 points**.

In addition, you must include a **Reflection** slide at the end of each skill set. On the Reflection slide, briefly discuss:

- **What you learned** from completing the lab.
- **What challenges you encountered** and how you addressed them.
- **What GenAI tool(s), if any, you used** and how they helped you complete or understand the lab.
- **How you would apply or improve** the skills you learned in future work.

Make sure your reflection is specific to the skill set and demonstrates your understanding of the lab.

Grading Policies

- Skill 1: Creating and Formatting Slides (5 points)
- Skill 2: Adding Visuals and Graphics (5 points)
- Skill 3: Presenting Data (5 points)
- Skill 4: Making the Presentation Dynamic (5 points)

Deliverables

- Submit **three separate PowerPoint presentations**.
- Each presentation must be submitted in **.pptx format**.
- Make sure all required skill sets and reflection slides are included in the appropriate presentation.
